Introduction

Welcome to our Annual Report and we hope you find it both a useful and interesting overview of our work towards improving the health and wellbeing of everyone who lives in Southport and Formby.

We began our second year of operation on 1 April 2014 with some new faces amongst the Governing Body following elections amongst our practice members, ready to build on the good progress made during our first year as the organisation responsible for the majority of local health services. There have been a number of notable achievements over the past 12 months that you will read about throughout this report.

In particular, our work to develop primary care made good progress this year through the introduction of our local quality contact for our member GP practices. One of the schemes focuses on improving access and this has resulted in many more appointments being made available to Southport and Formby residents. In the year ahead we will be working much closer with NHS England, the lead commissioner of GP practice services, giving us greater influence in the future development of primary care.

Good progress has been made over the past 12 months in our work to better 'integrate' or join up services right across health and social care. Through the Health and Wellbeing Board, we have launched Shaping Sefton towards securing the delivery of more integrated and effective care across the borough. We believe this approach will result in much more individualised support for our patients and carers, so they have a better experience of the services involved in their care, as well as benefiting from improved medical results. For the first time we have joint funding with Sefton Council through the Better Care Fund that will also support this work. This approach is also at the heart of our 5 year strategy, which we finalised this year and our Care Closer to Home programme, working closely with Southport and Ormskirk Hospital NHS Trust and other partners across Southport, Formby and West Lancashire, is making good ground in transforming services in line with this vision.

We are committed to working with Southport and Formby residents to ensure services are the best they can be, and we would like to thank all those who have shared their views and experiences with us so far. We have learned a great deal and we have used the feedback we have gained to inform our work.

We know there are great challenges ahead for the NHS and we will continue to work hard to meet our duties over the coming 12 months towards improving health and wellbeing of local people. We are proud that our commitment and ability was recognised at the end of 2014 at the NHS North West Leadership Academy Awards, where our Governing Body was shortlisted for its work and our chief officer was named Inspirational Leader of the Year.

We look forward to working together with you all - patients, carers, members of the public and other partners - in the year ahead and to achieving more for all Southport and Formby residents.

Dr Rob Caudwell

Chair

Fiona Clark

Chief Officer

Strategic report

About us

We are a membership organisation bringing together all the GP practices in Southport and Formby. As we are led by local doctors and other health professionals, we are ideally placed to understand of the health needs of Southport and Formby residents.

Whilst many local health priorities are similar to those experienced right across the country, the way we are formed helps us to better concentrate our efforts on the particular challenges faced here in Southport and Formby.

We plan and buy the majority of local health services and this process is known as commissioning. The range of services we are responsible for includes:

- Community based services – like district nursing and blood testing
- Hospital care – including routine operations, outpatient clinics, maternity services and accident and emergency care
- GP Out of Hours services – to ensure people still have access to a doctor when their surgery is closed in the evenings, weekends and bank holidays
- Mental health services – we commission many mental health services apart from very specialised care and treatment

We cannot do this alone and we work closely with a wide range of partners who have a stake in ensuring the good health and wellbeing of all Southport and Formby residents.

The Health and Social Care Act sets out our full statutory duties. This came into effect on 1 April 2013 when we took over many of the responsibilities of NHS Sefton, the former primary care trust, when it was dissolved at the end of March 2013.

What we do

In 2014-2015 we had a budget of £173.26 million to spend on commissioning health services for 122,585¹ Southport and Formby residents. A breakdown of this has been provided on page 51.

The majority of our budget, around 62%, is spent on hospital based services. Whilst we support people's right to choose where they are treated and who provides their care², the majority of the services we commissioned in 2014-2015 were from NHS Southport and Ormskirk Hospital NHS Trust. Since 2012, this has been an integrated care organisation, providing both hospital and community based services.

Our other main service providers include:

- Mersey Care NHS Trust – the leading mental health trust across Merseyside
- North West Ambulance Service NHS Trust – providers of patient transport services as well as its network of emergency response vehicles
- North West Commissioning Support Unit – which provides many of our administrative and operational functions like data management and performance reporting
- Other NHS organisations – like Aintree University Hospital NHS Foundation Trust, Liverpool Community Health NHS Trust, Royal Liverpool and Broadgreen University Hospitals NHS Trust, Liverpool Women's NHS Foundation Trust, Alder Hey Children's NHS Foundation Trust and Liverpool Heart and Chest Hospital
- Community and voluntary sector organisations – like Sefton Carers Centre and the Alzheimer's Society
- Independent and private sector providers – including Go To Doc that is led by doctors and provides our GP Out of Hours service

Last year we also saw a number of new providers delivering services like musculoskeletal, podiatry and audiology through a national scheme called 'Any Qualified Provider'. As a result, many residents are now able to access these services in locations and at times that are more convenient to them.

¹ 2014/15 estimated GP weighted population for Southport and Formby

² Choice of place of treatment is one of the rights included in the NHS Constitution

How we do this

We work with the local community and other partners, to improve the health and healthcare of everyone living in Southport and Formby, spending money wisely and supporting clinicians to do the best job they can.

To do this we need to understand all the information and medical evidence about current health and health services in Southport and Formby, to inform what more we need to do. This is so we can plan for health services that continue to meet the needs of local people in the future.

Our plans also have to meet a number of nationally set standards and requirements like the NHS Outcomes Framework³, the Five Year Forward View⁴ and the NHS Constitution⁵, which set out what everyone can expect from their national health service and what is expected from them in return.

Because the work of our partners also impacts on the health of local people, we are working closely together to ensure all our plans are aligned. This means that collectively, we have the opportunity to achieve more by sharing resources, reducing duplication and strengthening our combined efforts whenever we can.

The views of patients, carers and the public are also central to understanding what we need to do to improve health and health services, and we have been involving local people in this process too.

How we work and make decisions

Our organisational structure helps us to work effectively and commission the best healthcare possible, spending our share of NHS funding wisely.

Governing Body

Our organisation has a Governing Body⁶ that makes decisions about and is accountable for our work. It is made up of doctors and practice staff, lay members and our most senior officers. All GPs and practice staff are elected to the Governing Body by our members to represent their views about the overall running of the organisation. You can see the membership of our Governing Body during 2014-2015 on page 57.

Providing assurance

We have established a number of sub committees that report directly to the Governing Body to provide assurance in areas such as finance, audit, governance and quality. They all include representatives from our wider GP practice membership and you can see a full list on page 56. We meet regularly with the organisations who we commission services from to ensure they are meeting expectations and manage any issues, all of which is reported through our committee structure.

Locality working

There are 19 GP practices across Southport and Formby and these make up our wider membership. We have a constitution which binds us together. This legal document sets out how our member practices work together as part of the CCG, including governance arrangements, responsibilities and meetings.

We support practices to be actively involved in the work of the CCG. Much of this work is carried out in 'localities', covering four geographical areas, so practices can really focus on addressing the health needs of their individual communities.

Each locality is chaired by a GP and provides an opportunity for other professionals in practices, such as nurses and support staff to get involved in our work. Localities also gain commissioning support from our small team of experienced CCG managers to give practical help and advice.

Our four localities are:

Ainsdale and Birkdale

Central Southport

Formby

North Southport

⁶ Agendas, minutes, reports and other papers for our bi-monthly Governing Body meetings, which meet in public, can be found on our website. This includes regular performance dashboards for all key areas such as quality, safety, national and local requirements and finances

Who we work with

There are a number of other organisations that are involved in planning, buying, providing or overseeing your health and social care services, and we work closely with them all.

NHS England

We work closely with NHS England to ensure health services for Southport and Formby residents meet national and local standards. Whilst we are responsible for improving quality in primary care, NHS England is the commissioner of these services. Locally, NHS England – Cheshire and Merseyside oversees standards and holds the contracts for GP surgeries, dentists, pharmacists and opticians, as well as some screening and immunisation programmes. Other Teams also commission some other services you may need, including specialist, prison and armed forces healthcare.

Sefton Health and Wellbeing Board

We are core members of Sefton Health and Wellbeing Board. This committee of Sefton Council brings us together with others who have a lead responsibility for health and social care in the borough, including local councillors, council officers and Healthwatch Sefton. Together, we have devised a Sefton wide strategy for improved health and social care services. This was based on our Joint Strategic Needs Assessment, which brings together all the information we have about current health and social care services locally, to highlight where we need to do more in the future.

Sefton Council

The local authority is responsible for promoting and protecting good health across Sefton. It works closely with the national body, Public Health England to do this in partnership with NHS England and ourselves. Our joint aim is to encourage people to live longer, healthier lives, and to reduce the variation in levels of health experienced in different parts of Sefton. Much of this work is now coordinated through the Health and Wellbeing Board. In addition to this, we are working with Sefton Council to decide how best to spend the portion of existing NHS money being set aside for the new Better Care Fund. The aim of this is to support more seamless health and social care services that work better for patients.

Other clinical commissioning groups

We work with neighbouring clinical commissioning groups to plan and buy services when there is a benefit for Southport and Formby residents, or where services are provided across a wider geographical area, like hospital care. We share a small management team with neighbouring NHS South Sefton CCG as well as employing staff dedicated solely to our work. This means we are able to maintain efficient running costs and share good practice where it offers benefits to our local residents. It also helps us to work more effectively with Sefton Council and the Health and Wellbeing Board on borough wide programmes and initiatives. This is particularly important when we are addressing the variations in health that exist in different parts of Sefton, so that no one community is disadvantaged and improvements are experienced by all.

Provider organisations

The majority of services we commission are from other NHS organisations like hospital and community services trusts. In addition, we also commission some services from the voluntary, community and faith sector and private providers. We closely monitor the work of all our providers to ensure their services meet the high standards of quality we expect for our patients. We also involve our providers in planning how we might improve care in the future, and a number of these organisations are represented on some of our most important working groups.

Healthwatch Sefton

This independent organisation works on your behalf to ensure health and social care services are safe, effective and right for you. Healthwatch Sefton gathers and represents the views of people living in the borough. Because it is independent, Healthwatch can challenge those who provide services but it can also work in partnership with us and other statutory bodies to improve frontline health and social care. The chair of Healthwatch Sefton is a co-opted member of our Governing Body. The organisation also has representation on some of our other committees and working groups, including our Engagement and Patient Experience Group.

What this means for you

We work hard to make sure that as much of our budget as possible is spent directly on providing people's care and treatment. Some of the services and schemes that we were particularly proud of in 2014-2015 have been developed by our GP practice localities, others from working much more closely with our partners and provider organisations. Here are some examples.

Care home medicines project

This is the second year of the project, which carries out an annual medication review for care home residents. The scheme aims to improve the quality and safety of care for these patients. Through more regular monitoring of patients' medicines we can ensure they are taking the most appropriate ones for their condition at the right time. In 2014-2015 we reviewed over 700 patients, the scheme helped prevent people from needing hospital treatment on 47 occasions. Around £85,000 was also saved through better and more effective prescribing. In addition, pharmacists also provide advice to nursing home staff around the safe management of medicines, and act as a bridge between nursing homes, primary care and hospitals – all with the aim of improving the treatment and experience for this vulnerable group of patients.

Connected Communities

This project was developed by two of our GP localities - Ainsdale and Birkdale and Central Southport. Evidence suggests that social isolation amongst the elderly can impact gravely on wellbeing and quality of life, with demonstrable negative health effects. Connected Communities aims to improve older peoples quality of life and help them to better manage their health. Connected Communities provides a link between health professionals and residents who have been identified as possibly being socially isolated. The service provides support, information and advice about services and social activities available near to where they live. In its first nine months 103 individuals had been referred to service and a number of these have been supported to attend 205 social or health and wellbeing activities. Others were signposted and introduced to other support services and agencies.

Case study - Mr and Mrs S met Connected Communities staff in October 2014 at a flu clinic. They were told about the project and their daughter was particularly keen for them to get involved as she lives away from them, causing her genuine anxiety. Mr and Mrs S are both in their 90s and have been married for nearly 70 years. Both have health or social care problems. They were given some information at the flu clinic about activities near them and by the time they had a home visit from the Connected Communities team, they had already begun to try some out. As a result of getting involved in Connected Communities they now attend a shared reading group, as well as taking part in leisure activities and luncheon clubs. Their daughter said: "It was wonderful for me to see how animated my mother in particular became at your visit, and I am so pleased that they now to go to the Ainsdale Community Centre on a regular basis and have contact with other people. Thank you for all you help and concern."

Care at the Chemist

We re-launched this scheme in 2014-2015, giving more people easier access to free advice and treatment by simply visiting their local chemist. The new scheme offers over the counter help for a much wider range of conditions and saves people a trip to their GP surgery. Anyone who joins Care at the Chemist can be assessed by an expert pharmacist, who will advise them about how to treat their condition. This includes supplying people with any medicines they might need, which are free for anyone who does not pay for prescriptions and costing no more than a prescription charge for everyone else. From speaking to people when we were developing our 5 year strategy, many told us they would like more services to be available at their local pharmacy and Care at the Chemist helps to achieve this. Around 10,500 medicines were dispensed through Care at the Chemist this year.

Alcohol recovery centre

Over Christmas 2014, Southport was chosen as one of a small number of locations across the country to launch a new national scheme treating people affected by alcohol over the festive party period. Based in the heart of the resort, the temporary alcohol recovery centre was equipped with several beds, offering those who have become vulnerable due to alcohol onsite support from health care professionals. We led the initiative locally working with Southport & Ormskirk Hospital's specialist hospital alcohol liaison team, known as HALT, Merseyside Police, North West Ambulance Service and volunteers from local faith groups. It was funded by the National Licensed Trade Association's Barcode initiative as part of their programme to roll out mobile alcohol recovery units in different parts of the country.

Formby GP care home pilot

This 12 month pilot involved paying care home residents two visits a week by a local doctor with the aim of keeping them as well as possible, for as long as possible. A GP carries out a weekly 'ward round' at care homes in the area to assess patients and spot early any changes in their conditions. Care home populations are rising, with more vulnerable patients with increasingly complex needs. Four in five care home patients have memory problems or dementia and many have several long term conditions. Regular, proactive GP visits mean that health problems are spotted at an earlier stage, and can often be treated in the home. In this way, emergency admissions to hospital due to a sudden health crisis can be prevented. The Formby pilot is already proving beneficial for both residents and staff and the results will inform future service developments.

Supporting better health and wellbeing

New app and digital TV system

We launched a new information system in spring 2014, making health advice and information available to our residents via an app for smartphones and digital interactive TV systems. The Looking Local service helps people to get information about living a healthy lifestyle, locating their nearest pharmacy, GP or dentist, as well as local contacts for more help and support. Some people can also book appointments at their GP practice using Looking Local. Our Looking Local channels can be found on Sky and Virgin media TV, internet and mobile web, Wii games consoles and as two apps for smartphones or tablets. Here's how:

- Sky - Go to the Community Channel (539) and press the RED button. Then search for your area or choose: Northern England, North West, Merseyside then NHS Southport and Formby CCG
- Virgin media - Press the HOME button on your remote control, choose INTERACTIVE, select "Local & Directory Enquiries", select "Looking Local", or Go to the Community Channel (233) and press the RED button. Then search for NHS Southport and Formby CCG
- Online / Wii / mobile web - www.lookinglocal.gov.uk/southportformbyccg or
- To download the app - go to either Google Play or the iTunes App Store – then search for NHS SFCCG

Examine Your Options

This campaign supports our wider plans to deal with the additional demands on NHS services over the busy winter months. It aims to raise awareness amongst Sefton residents of the options available to them when they are ill. The campaign is evaluated each year and as a result, in 2014-2015 we placed even greater focus on the support available from GP practices, the GP out of hours service and local pharmacies. The campaign included newspaper adverts promoting holiday opening times over Christmas and New Year and it could also be seen on buses and at a number of Merseyrail stations. Supporting information materials were also distributed to a wide range of local organisations.

VCF Direct

We have been working with Sefton CVS to develop a new online directory of services provided by the voluntary, community and faith sector, currently known as VCF Direct. This system is aimed at primary care professionals to help them signpost and directly refer patients to a wide range of support to improve their health and wellbeing offered by this sector. It is being tested in a number of GP practices with the aim of rolling it out more widely over the year ahead.

Investing in our local communities

For the second consecutive year, and together with NHS South Sefton CCG, we awarded around £1 million to local voluntary, community and faith sector organisations. We recognise the valuable role these groups play in achieving better health and wellbeing for our residents. This is reinforced by what local people consistently tell us, that these groups are important in providing them with support.

Through Sefton CVS, organisations were asked to submit bids for one off funding to support specific initiatives. There were 20 successful bids in 2014-2015, specifically addressing the following priorities in line with our 5 year strategy, Sefton Health and Wellbeing Strategy and the Sefton Strategic Needs Assessment:

- Ensure all children have a positive start in life
- Supporting older people and those with long term conditions and disabilities to remain independent and in their own homes
- Promote positive mental health and wellbeing

The range of successful organisations included Brighter Living Partnership, Parenting 2000, Expect Ltd and Sefton Children's Trust and nearly all are working with other VCF groups to deliver their projects. These are exciting schemes, often designed and delivered by local people for others who live in their communities. Here are some examples of how these grants have been put to use so far:

Ainsdale Community Care

This organisation provides a luncheon club on site and also delivers hot meals through a home delivery service. It offers a variety of activities for older people such as Qigong, the name for Chinese yoga, a reading group, sequence dancing, cooking for beginners and art. Activities are designed to improve the overall wellbeing of older people living in the local area. It also signposts people to relevant services or raises awareness of other support organisations. Many of the older people are vulnerable and have long term conditions. In addition, most who attend live on their own, or are on their own during the day while other members of the household are at work. This year Ainsdale Community Care has supported thousands of local residents.

Case study - One man had been living on two packets of chips a day and was vitamin deficient. His GP referred him to ACC and is now losing weight. He has transformed from an undernourished lonely figure to a far more vital, happy force with new friends and new interests. He plans to start a degree in theology and has commented about coming to ACC: "It's a wonderful place, always lots to do and lots of people to meet. The activities are really first class."

Case study - One of the 80 active volunteers, joined in the summer after being made redundant and was advised by his GP to look for voluntary work. His confidence visibly grew and in the autumn he was looking to start his own business after being unable to secure a job. He had been working doing handyman jobs and working in the hall serving the lunches and helping clean up after lunch. He says: "My time here is interesting, very enjoyable. You get to meet some very nice people. It gives me something to get up for in the morning, gives me a sense of purpose and keeps my spirits up."

Navigate

This Southport based project is helping young people turn their lives around when faced with accommodation issues or problems with their lifestyle. Between September and December 2014, the project supported 19 young people giving advice on suitable accommodation and encouraged attendance at college while addressing any issues of risky behaviours.

Case study - "Before Navigate my situation was not the best. I was 7 months pregnant and living with my boyfriend in his dad's house. I could not go home at that point and I was not wanted at my boyfriend's either. I was in a bit of a mess and didn't know what to do next. I was going to be homeless with a baby on the way. I was trying to keep it under control but I came to college one morning and I just had a breakdown. I was told about the project from the student services at college and it seemed that it was the best option for me. I was so glad to have met Anne Marie from Navigate because I literally had no one else to help me. I am not very good at sorting things out for myself. I did not know how I could get out of my situation for the sake of my baby and me. I feel nervous and not very confident; I have always been like this. When Anne Marie from Navigate came to meet me, we had a cup of tea and a great big chat. I told her everything that was going on and straight away she started to make us a plan. We quickly sorted out my maternity grant and sorted out all the receipts, applied for the milk and fruit voucher scheme and applied for the college bursary. We have spent a long time trying to find suitable accommodation. She explained how the housing benefit payments and discretionary fund works and made it seem a lot simpler than what I had understood. I now understand what benefits I am entitled to. Things are on track with my Mum now too. I am surprised and so grateful at how much support the Navigate project has given me, I can ask for help at any time and as a result I am on track with my course work and my attendance improved as well. Navigate has given me the support that I needed at the time and I will continue to ask for help with any problems that I face in the near future.

Sefton Veterans

This is a new one stop shop for Sefton's military veterans that opened its doors in May 2014, offering advice and assistance on a range of issues including health, housing and employment by working with a range of specialist organisations to provide personalised support under one roof at the Bowersdale Resource Centre in Seaforth. The service is currently looking to identify a second base in the north of the borough. This free and confidential service is open to all military veterans and former reservists no matter what their age, or how long they have served in the armed forces – even if it was just for one day. The service also provides support to families in the armed forces community, as well as current serving personnel.

Case study - a former member of the parachute regiment said of the service: "Just over a year ago I was really down on my luck - I had no job, I was angry at myself and I was struggling to support my girlfriend and kids. A couple of guys I know told me about the Sefton Veterans Project. Because it is run by an ex squaddie I went to see them. I knew they would understand and I knew I could talk to them without being embarrassed or feeling like I was a loser or a waster. It was great talking to vets again. The project manager, Dave Smith, managed to find some funding and training for me. I now have a full time job and I can now hold my head up again and support my family."

Transforming healthcare

We know that demands on health services are increasing, whilst at the same time the public sector is being required to work within tighter financial boundaries. The approach we set out in our strategy responds to these challenges and goes further - committing us to make much needed improvements to the health and wellbeing of all local residents.

Whilst the performance of local health services has been good since we became responsible for commissioning in April 2013, we know we have to change the way we currently do things if we are to achieve our vision and make a real difference in the future. Central to this is ensuring that the health needs of Sefton residents are at the heart of everything we do.

To do this, we believe that we need services which work more closely, or 'integrated', right across health and social care and the following three schemes will support this.

Shaping Sefton

Through the Health and Wellbeing Board, we are embarking on a system wide programme to improve and transform health and social care. Shaping Sefton launched in February 2015 with an event supported by the independent and highly respected think tank, the King's Fund. The event brought together leaders from across the system and focused on how we might work better together to coordinate care around the needs of our patients, carers and their families. The King's Fund sets out compelling evidence which highlighted the great benefits for patients when organisations and services work better together. This work will progress in 2015-2016 to include more detailed work about how we might achieve this locally.

Locality model of care

We know from speaking to local people that they really value the care they receive from GP practices and community services, provided close to where they live. We believe there are great benefits in wrapping services around our local communities, so we are developing a locality model of care that mirrors our **GP practice localities** – Ainsdale and Birkdale, Central Southport, Formby and North Southport – to really focus on the needs of these four distinct communities. We see a variety of professionals from across health and social care playing a greater role in these locality teams, in line with our vision for Shaping Sefton.

Better Care Fund

For the first time health and social care have been required to pool a proportion of their budgets together through the Better Care Fund and we believe this presents us with great opportunities to meet our shared objectives. In 2015-2016 our joint Better Care Fund will total around £24 million and we have agreed with Sefton Council to use this towards reducing unplanned admissions to hospital. One of our overarching transformational programmes, **community centred care**, will support this work. The fund will also be used to develop an **integrated wellness service** and to improve **intermediate care and reablement**. Voluntary, community and faith sector organisations are important partners in this work and we recognise their valuable role in creating a more innovative and effective local health and social care system now and in the future.

Why things need to change

Southport and Formby stretches from Ince Blundell in the south to Churchtown in the north, situated along the North West coast.

There are a number of distinct environmental and social factors that we must take account of when we are planning local health services including:

- Our population is made up of a significantly higher than average proportion of older residents with an estimated 25.8% (approximately 29,600) of the population over the age of 65 compared to 17.5% aged over 65 nationally
- The number of over 65 year olds is expected to grow further to more than 31,000 in the next ten years
- The number of people aged 85 and over, whilst smaller than other age groups, is set to see significant growth from an estimated 4,600 in 2015 to an estimated 5,300 by 2019 - an increase of almost 20%
- Our residents live in economically diverse communities, with areas of affluence and pockets of deprivation. The areas of highest income deprivation affecting older people are concentrated in central Southport with some pockets of income deprived older people in Ainsdale and Norwood.

Overall, health in Southport and Formby is getting better but there are clear areas for improvement:

- Life expectancy in our least affluent communities remains unacceptably low
- Levels of some long term health conditions are higher than the national average
- The number of early deaths from heart disease and cancer have reduced over the last decade as smoking rates have declined but we want to do more to close the gap between Sefton and the national average
- Our patients are better educated about risks to their health and the importance of leading a healthy lifestyle and we want this trend to continue

Our 5 year strategy

We finalised our 5 year strategy for improving health and health services in the summer of 2014. We have developed our strategy jointly with NHS South Sefton CCG, so we can work across a wider area when we need to but also concentrate on our very local priorities.

This joint approach also makes it easier for us to work with partners like Sefton Council and better join up or 'integrate' our plans and services whenever we can, to work more efficiently in this challenging time. Importantly, it means we have the potential to achieve more for local residents than we could do individually, as there is greater strength in working together.

A great deal of work went into the design of our 5 year strategy to ensure it focuses on improving those aspects of healthcare that will make the most difference to the health and wellbeing of our local residents.

It has been shaped by the Sefton Strategic Needs Assessment, often known as a JSNA and our Sefton Strategy for Health and Wellbeing, so it is aligned to the plans of our partners from Sefton Council and responds to what we know is needed most in Southport and Formby.

We also spoke with local residents to gain their views and we added three new programme areas to our 5 year strategy as a result of what we were told.

Our 5 year strategy helps us to ensure we are meeting all our statutory duties, such as those set out in the NHS Outcomes Framework, as well as the overarching Health and Social Care Act 2012.

Our vision is to:

"To create a sustainable healthy community based on health needs, with partners; focused on delivering high quality and integrated care services to all, to improve the health and wellbeing of our population"

Our priorities

We have identified three main strategic priority areas as the focus for all of our work:

1. Care for our older and vulnerable residents
2. Unplanned care
3. Primary care

To make improvements across all of these areas, we believe we need to organise many services around our **GP practice localities**. We have devised a number of **transformational** and underpinning **health programmes** to support this way of working. You will notice there are connections between nearly all of these workstreams.

All of our programmes are led by clinicians, and this means that in general they will also be GP members of our Governing Body.

Transformational programmes

The following two transformational areas of work are aimed at ensuring health services adapt so they can meet the healthcare challenges of the future.

Community centred care

This is currently known as Care Closer to Home and involves a wide range of partners from across health and social care to provide more joined up or 'integrated', locally focused and personalised services.

Primary care transformation

Whilst NHS England is the commissioner of GP practices, CCGs have a role in improving quality in primary care. We have a strategy for primary care which works alongside our wider five year strategy for all services.

Health programmes

The following specific health programmes underpin our transformational programmes:

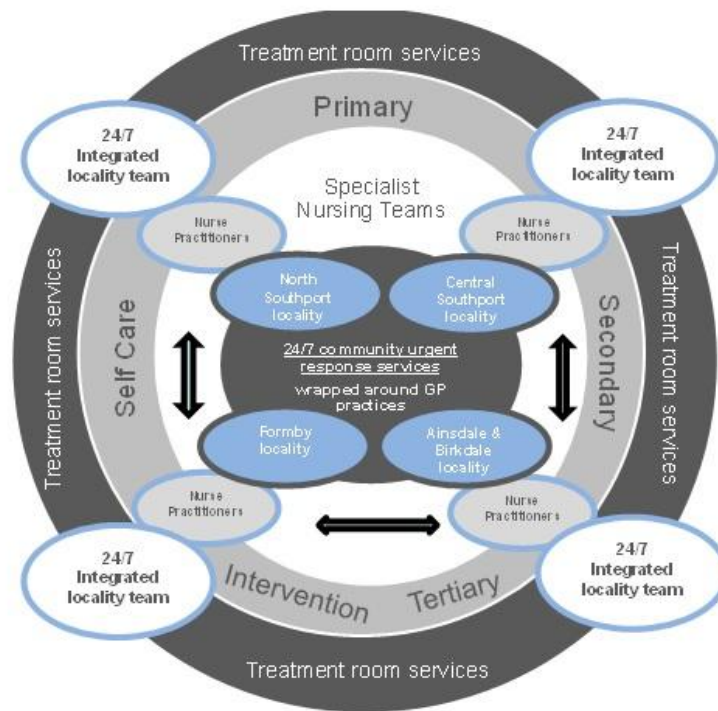

- Mental health, cardiovascular disease, respiratory disease, diabetes, cancer, children and care for people at the end of their lives

We added the following three programmes to our strategy as a result of our discussions with local people:

- Liver disease, kidney disease and neurology – including conditions like Parkinson's and Motor Neurone diseases and epilepsy

Our strategy is already evolving and during the last part of 2014-2015 we began work developing a blueprint, which will set out how we will turn our strategy into action in the years ahead to tackle all of these health priorities. In line with our joint Better Care Fund programme with Sefton Council we will also be focusing on improving **intermediate care**.

What will this look like?

Transformational programmes

Community centred care

We want to transform services, so care is more effectively wrapped around our patients, particularly those who are older and frail. This means creating a healthcare system where professionals across organisations work closely together as part of the same team. The partners involved in this work are from right across health and social care and include Southport and Ormskirk Hospital NHS Trust, Liverpool Community Health NHS Trust, Sefton Council, Sefton CVS, Mersey Care NHS Trust and North West Ambulance Service. We will use money from the local Better Care Fund in the year ahead towards further developing this work to transform the way hospitals, community services, social services and voluntary, community and faith organisations work together with GP practices to provide more effective, person centred care. These **proactive** and **urgent care** programmes look to tackle the high numbers of emergency admissions to hospital, particularly over the busy winter months, for some of our older and most vulnerable residents. There were some important developments for our patients in 2014-2015.

Strengthening community services

We are working with Southport and Ormskirk Hospital to ensure that community services are wrapped around our localities, so they are more responsive to the needs of our residents and our GP practices. We also want community services to work much more seamlessly with hospital services, to improve our patients' experience of care. We are also working closely with NHS West Lancashire CCG, who also commission services from Southport and Ormskirk Hospitals, to progress this work and we expect to finalise our plans for future services in 2015-2016.

Care Closer to Home strategy

This document sets out a joint vision for improving urgent care amongst all health and social care organisations across north Sefton and West Lancashire. In early 2015 the strategy was refreshed and revised so that it more fully takes account of the challenges we all face in responding to the changing needs of our ageing population. It also details some examples of services that have been designed to better deal with the increasing future demand for urgent care services, some of which you will read about below.

Community Emergency Response Team

Now in its second year, the nurse led, multi-disciplinary Community Emergency Response Team (CERT) provides care to some of our most vulnerable, older patients. CERT acts as a bridge between hospital and primary care, working with those patients who need extra support but who do not need to be in hospital. GPs refer patients whose condition may be deteriorating to CERT to give additional, more appropriate care. CERT also works with hospital patients, so they do not stay on the wards any longer than they need to and get home quicker. This service has continued to show good results for our patients and is contributing to reducing the need for people to be admitted to hospital when they can be cared for more comfortably, safely and appropriately in their own home or in another community setting.

Intermediate care

This is sometimes called a 'halfway home' service for people who do not need hospital care but who need some additional support to help them recover fully from illness or injury. Intermediate care brings together a range of services to promote faster recovery from illness, prevent unnecessary urgent admission to hospital, premature admission to long term residential care, or to support timely discharge from hospital – all with the aim of maximising people's independent living. We are working closely with Sefton Council to improve intermediate care through our Better Care Fund programme. During 2014-2015 we reviewed current services and began work to draft a blueprint for how these might be improved in the year ahead. We want future services to give increased focus on 'step up' care, for those people who may not have been admitted to hospital but who need additional support for their condition. We expect future intermediate care to be largely provided in a person's own home but these services will need to be flexible so that some people with additional needs can be treated in a community based intermediate care setting when they need it, working even more closely with the CERT team.

Primary care transformation

We know that primary care must adapt and respond to the changing needs of our local residents if it is to remain effective in the future. As a clinical commissioning group, we do have a duty to ensure that the quality of services provided in local GP practices continually improves.

In 2013 we produced a discussion document, 'A Sense of Purpose' setting the context and current challenges faced by primary care. This helped to focus the debate between our member practices as to how we could move forward. Alongside this, we held conversations with our partners, patient groups and voluntary and community organisations to gain their views on the future of primary care.

All these conversations and discussions helped us to design and agree our primary care quality strategy, 'Energising Primary Care', another element of our wider five year strategy and setting out a vision for enhanced primary care by 2020. Energising Primary Care complements the national Call to Action for primary care and the opportunities that new GP contracting arrangement presents in five areas:

- Practice demographics – planning for the changing health needs of our patients
- Workforce development - to ensure staff have the skills for the future
- Clinical outcomes – improving results for those with long term conditions and other medical problems
- Estates and IT – so our infrastructure is fit for purpose
- Health outcomes – to better support people's wider wellbeing

To oversee this work there is a joint primary care programme group with NHS Southport and Formby CCG, reporting to our quality committee. It brings GP members together with commissioners from NHS England, the Local Medical Committee, Healthwatch Sefton and Merseyside Property Services.

Here are a few examples of our progress in 2014-15.

Local Quality Contract

Whilst NHS England is the lead commissioner of services in primary care, CCGs may also commission a number of practice based initiatives to support their wider strategies with the aim of improving quality. The introduction of the NHS Standard Contract in August 2014 changed the way CCGs contract with practices for these quality schemes. Practices can choose to sign up to a range of schemes including reviewing A&E attenders, phlebotomy and Ankle Brachial Pressure Indicator testing. Our improving access to primary care scheme has seen at least an additional 128 appointments per week being offered to patients across Southport and Formby practices this year. A review of schemes will take place annually taking into consideration national changes to primary care services. Work is currently being progressed to introduce a frail elderly scheme to complement our wider objectives.

Healthcare assistant apprenticeship scheme

As part of our response to the Francis Report, we devised an exciting 15 month apprenticeship programme in conjunction with Hugh Baird College to support workforce development in primary care. This was introduced in November 2014 to enable practices to receive part funding to train and develop an apprentice healthcare assistant. There are 10 trainees in total across Sefton and at the end of the course they will gain an accredited qualification validated by Edge Hill University.

Primary care co-commissioning

NHS England is giving CCGs the opportunity to assume greater influence over the commissioning of primary medical care from April 2015. CCGs are GP led organisations who understand primary care and are passionate about improving its quality, across all practices in their own geographical areas. In order to harness the benefits of co-commissioning, yet guard against any conflicts of interest, NHS England has developed robust new and transparent arrangements for managing perceived and actual conflicts of interest.

There are various levels of co-commissioning for CCGs to become involved in.

NHS Southport and Formby CCG has opted for 'joint commissioning arrangements'.

This will enable the CCG to assume responsibility for jointly commissioning primary medical services with NHS England through a joint committee. This will provide an opportunity to plan and improve the provision of out of hospital services for the benefit of patients and local populations, and provide an option to pool funding for investment in primary care services.

Health programmes

We have been strengthening our health programmes this year towards improving care for our patients.

Some developed services and initiatives that are focused at locality level to target specific groups of patients, whilst others looked across Southport and Formby or beyond to address some of the issues that affect us all. In 2015-2016 we will be giving additional focus to our mental health, cardiovascular disease (CVD) and respiratory programmes, where we know we need to make much quicker advances.

Mental health

Respiratory health

Cardiovascular disease

Diabetes

Cancer

Children's health

Care for people at the end of their lives

Liver, neurological and kidney health

Mental health

We believe that improving mental health is just as important as improving physical health. This is an area we will give greater focus to in the year ahead, so we can make quicker progress to bring it in line with our other areas of priority. We know this will mean transforming mental health and dementia services so they can more effectively deal with the challenges of our ageing population, unacceptable inequalities in health and wide variations in the quality of and access to these services. As well as continuing to develop services this year, we carried out a major review of mental health and dementia care and this will to shape how we move forward in 2015-2016.

Mental health task group

In May 2014 we formed a mental health task group to look at how we might begin to transform current services, so they offer Southport and Formby residents much better treatment, care and support.

This task group was clinically led by a GP and its initial aim was to gain a thorough understanding of current services and what outcomes they offer our patients. The group was also tasked with examining what works and what does not, supported by evidence and best practice, to identify a vision for mental health and dementia care that we can begin to introduce in 2015-2016.

A comprehensive report was presented to our Governing Body in March 2015, who approved the task group's recommendations to shift mental health and dementia services towards:

- Increased efforts to embed prevention in services starting from primary care, in line with our GP locality model of care
- Earlier diagnosis and intervention that result in people being less dependent on intensive services
- When people become ill, recovery and care takes place in the most appropriate setting and enable people to regain their wellbeing and independence
- Services that work seamlessly and more cohesively together

Next steps

In 2015-2016 we will establish a mental health transformation board to advance this work and which will make decisions on the future of mental health and dementia services.

Alongside this we will continue to work with providers to shape services, so they are more responsive to the needs of our patients and carers, and which are work more closely with our GP practice localities.

Improving psychological therapies

In 2014-2015 we reviewed and revised the contract for this service, so it will give people greater access to a much wider range of psychological therapies. This is a Sefton wide service, which we commission jointly with NHS South Sefton CCG and in early 2015 we awarded the new contract to Cheshire and Wirral Partnership NHS Trust. From April 2015, this service has been known as Access Sefton. It will continue to operate from the same locations, so patients will not notice any difference to the quality of these services but there will be noticeable differences in the months ahead. For the first time, people will be able to access these services directly without having to be referred to them by their GP. People will also be able to get help for a wider range of problems including long term conditions.

New Asperger service launches

This Sefton wide service was launched at the start of December 2014, providing support and diagnosis for those living with Asperger Syndrome. Along with NHS South Sefton CCG, we commissioned the service after hearing from local carers and patients, many of whom had previously struggled to get diagnosis and support. Over 100 referrals were made to the specialist service, run by Mersey Care NHS Trust, in weeks and months ahead of its launch. The service is available to adults aged 17 years and over. The service will also give advice, support and education to partners and families of people with Asperger Syndrome.

Improving dementia diagnosis rates

This is a national priority for all CCGs and locally we are working to improve dementia diagnosis rates in a number of different ways, working with our member GP practices and service providers. Dementia screening takes place in many of the programmes, schemes and services you have read about in this report, including our Virtual Ward and our Care Homes Innovation Programme. We expect all these initiatives to help us increase dementia diagnosis rates in the year ahead.

Child and adolescent mental health award

Along with NHS South Sefton CCG, we were awarded a £75,000 grant in December 2014 for an innovative pilot to transform services for children and young people with mental health issues. A consortium, bringing us together with Sefton Council and the voluntary, community and faith sector, will use the funding to put in place youth focused emotional wellbeing services in the community which will deliver specific services that meet the needs of young people. Ours is one of only eight schemes in the country to have been awarded a share of £500,000 to improve child and adolescent mental health services, known as CAMHS. The pilots aim to create time for staff to reassess the systems in place to commission - from schools up to inpatient beds - and try to affect change through new ideas involving children, young people and their families in the process.

Respiratory health

This programme covers a range of conditions and the two that affect Southport and Formby residents the most are chronic obstructive pulmonary disease, better known as COPD and asthma. Respiratory conditions are the cause of thousands of emergency hospital admissions each year and we know that many of these could have been prevented if patients had more support to better manage their condition. We also know that many people are suffering from poor respiratory health but will not as yet have had their condition detected.

Joining up services for improved care

We have begun to review respiratory services to determine how they might work better together through our Care Closer to Home programme, making it easier for patients to get the right, more streamlined care and support that they need in a more timely way.

Respiratory training programmes

This year we have been exploring different training options for practice staff to better identify and manage their COPD and asthma patients. This will include training for practice nurses around spirometry testing, so they can better identify respiratory problems amongst patients.

Identifying undetected need

During the year ahead we plan to adopt an initiative developed by our colleagues in NHS South Sefton CCG to help identify the high numbers of people living with an undetected respiratory disease. The 'breathe well roadshow' offers people a free lung health check and advice about breathing problems. In two days of the roadshow being in Bootle, more than 80 people had a lung health check, with over 50 of these identified for the first time as having a lung problem, resulting in them being referred for further tests.

Cardiovascular disease

We want a community based model of care for cardiovascular disease, as part of a wider integrated approach to long term conditions within community services.

Improving cardiology services

During the year we have been working with Southport and Ormskirk Hospital, Liverpool Heart and Chest Hospital and Liverpool Community Health to improve local cardiology services. This has particularly focused on:

- Early access to essential diagnostic testing
- Timely referral to specialist interventions and treatments
- Ongoing community support to help people to better manage their own condition
- Early access to local rehabilitation services to improve longer term health outcomes

Atrial fibrillation and stroke prevention

People with an irregular heartbeat are at greater risk from stroke. As part of our work around stroke prevention we have been working with public health and wider health care professionals to identify patients who are living with an irregular heartbeat to improve management of their condition. This includes:

- Identifying more patients through the NHS health check programme for those aged 40 to 74
- Carrying out more opportunistic pulse checks in GP surgeries and clinics
- Using modern technologies such as hand held electrocardiogram machines to help clinicians diagnose atrial fibrillation more easily
- Installing specialist software – called GRASP AF - in practices to assist with the identification and management of patients with an irregular heartbeat
- Working with pharmacies and medicines management to optimise patients' medications to reduce their long term risk of stroke

Stroke care

We are working with Southport and Ormskirk Hospital and the Cheshire and Mersey Stroke Network to improve the quality of care for patients who have suffered a stroke. We aim to improve the quality of treatment for patients in the first 72 hours of having a stroke. We also want an excellent local rehabilitation service, which will support patients in making a better recovery and improve the quality of their lives. This also means putting improved assistance in place so patients can be discharged from hospital more quickly with support and ongoing therapy in their own homes.

Diabetes

We know that local diabetes care ranks amongst some of the best in the country for supporting people to control their diabetes and we want to build further on this. Work is progressing to develop a more integrated service, with an enhanced diabetes nursing team at its core. We envisage much closer connections between community services and our GP practice localities, so patients can receive more of their care close to home.

Other areas of focus during 2014-2015 included:

Diabetes working group

We have come together with partners from across the borough to increase awareness of preventable type 2 diabetes and to better identify those at risk of this condition and support them to take steps to prevent it. The group brings us together with colleagues from NHS South Sefton CCG, Sefton Council's public health team and voluntary, community and faith groups. In the year ahead the group will further develop a work plan towards achieving these goals.

Training and education

We are examining ways to improve training opportunities for health professionals and better education for patients, both of which are essential to a high quality diabetes service. Both of these aims will be progressed in 2015-2016.

Better footcare for diabetes patients

Cheshire and Merseyside Diabetes Network began a project during the year that will improve footcare for our local diabetes patients. The project focuses on three elements of footcare - a primary care pathway, a hospital care pathway and antibiotic guidelines and over the coming 12 months, we will be working with our member practices, community services and hospitals to begin to put the recommendations into practice.

Cancer

Like services for all of our other health programmes, we expect future cancer care to be more joined up between hospitals, community and primary care. We also know that early detection is crucial in improving people's chances of making a good recovery.

Breast care services

In September 2014 we took immediate action to ensure that patients referred by their GP to these services continued to be seen within two weeks. It followed Southport and Ormskirk Hospital's decision to close its service to new patients because it could no longer be run safely due to staffing problems. Patients have always been able to choose where they receive treatment for these services and we worked with other nearby hospitals to ensure continued high quality and timely care. We know from speaking with patients in early 2015 that they appreciated having aspects of their care, particularly follow up support from breast care nurses, provided locally. So, at the end of March 2015 we secured longer term ongoing arrangements for existing Southport and Ormskirk patients from St Helens and Knowsley Hospitals NHS Trust.

Quicker diagnosis of lung cancer

All patients with an abnormal chest x-ray and a high suspicion of lung cancer will now routinely have a scan. This avoids the time delay and anxiety of patients having to consult their GP and then waiting to be seen in a cancer clinic. Many patients will not have cancer at all and will be reassured much sooner than was the case with the old system.

Macmillan Cancer Information Centre

The centre, based at the Living Well Centre on Scarisbrick Avenue is run in partnership with the charity Macmillan Cancer Support. It offers a wide range of information, advice and practical assistance to cancer patients, their friends, family and carers. Use of the centre has increased greatly during 2014 with 2,500 contacts with local people. A series of health and wellbeing events have been held in Southport, giving people an informal opportunity to meet health professionals and others affected by cancer, to find out about the practical, emotional and financial support that is available to help them live with and beyond cancer. This year Macmillan has supported the appointment of a wellness and activity coordinator role that will support people to become more physically active and make healthier lifestyle choices after a cancer diagnosis. There is compelling evidence that this approach helps individuals to recover from cancer and the side effects of treatment and reduces the risk of many types of cancer recurring.

Children's services

With our partners in the Health and Wellbeing Board we have been developing a children and young people's strategy that will be finalised in 2015-2016. This will set out overarching goals for improved health and wellbeing of all our children and young people.

We want an integrated community model of care for children and young people, underpinned by community nursing, support and therapies. We also want enhanced palliative care and psychological services for children and young people, as well as services that are better equipped to deal with a child's transition to adult care.

During the year we have been working with a wide range of partners – from NHS England, service providers and Sefton Council, to voluntary, community and faith sector organisations - to review current services, identify how they can work better in the future and to address different aspects of health and wellbeing. Important developments last year include:

Children's community nursing team

Following a successful pilot we are continuing the children's community nursing team, which works between hospital and primary care. It aims to provide better support in the community to prevent the need for hospital, as well as working with young patients on the ward to get them well and back home as quickly as possible. As a result more children are being treated at home rather than having to spend time in hospital and last year the team treated 571. We tested a new direct referral system for GPs to this service in the year, and we are now planning to extend this system to more of our GP practice over the coming months.

Reviewing children's therapies

We have been looking at how we might improve services like physiotherapy for our children and young people, so they are better integrated with other services, like the children's community nursing team. This work is continuing in 2015-2016.

Paediatric audiology service

In August 2014 we confirmed a new provider for this service, based at Southport Centre for Health and Wellbeing. Bridgewater Community NHS Trust took over the running of this relatively small but specialist service and the organisation has a strong track record in delivering community based audiology services in the North West. This development offers a more clinically secure service for Southport and Formby patients in the future.

Care for people at the end of their lives

We want to improve the quality and experience of care for people nearing the end of their lives. We know there is more we can achieve for this group of patients but encouragingly we are now supporting more people than ever before to be cared for and to die at home when they choose this.

TRANSFORM team

The Transform programme was developed by the National End of Life Care Programme in partnership with the NHS Institute for Innovation and Improvement and health and social care professionals from a wide range of organisations. It was established in response to the challenges identified in the Department of Health's End of Life Care Strategy in 2008. We piloted a local TRANSFORM team in 2014-2015 and because it has been so successful we are continuing to fund the team for a further three years. The team aims to change the culture of end of life care within hospitals, reducing avoidable admissions, supporting people through the system to ensure safe, timely and appropriate discharges. Support is also given to carers along with spiritual and bereavement care. This team works closely with community end of life services including community specialist palliative care nurses, Queenscourt Hospice and its Hospice at Home service to support the wishes of patients, carers and families being achieved.

Hospice at Home

Provided by Queenscourt Hospice, this service supports patients at the end of their life to be cared for and to die at home in accordance with their wishes. The consultant led service offers wraparound support from the moment a patient is referred to the team – from hospitals, GPs or community service. It provides a day and night sitting service to support patients and their families and home visits when care is needed quickly. Hospice at Home has continued to see a rise in referrals and in the number of people it supports.

Better end of life care across our services

Improvements to many of the services and programmes that you have read about in this report so far will also contribute to better care for our patients nearing the end of their lives, including our locality model of care. Here are some other examples:

- Working with care homes – training for staff to ensure care for their residents is planned around their wishes
- District nurse night service – this service has been based in Old Swan, causing delays for local patients requiring support during the night. From April 2015 this service will return to Southport and Formby and will be based at the GP on Call Centre at Southport Hospital

Liver, neurological and kidney health

We added these three new areas to our list of health programmes as a direct result of what people told us when we were developing our 5 year strategy. Work began in 2014-2015 to look at how we might make improvements and this will continue over the year ahead.

Liver disease

Nationally liver disease is increasing. This is often associated with alcohol abuse, which is evident within areas of Sefton. The long term health and economic consequences of alcohol abuse and liver disease are well recognised. Alcohol consumption amongst young people has been identified as a challenging area for us to address. We will review and assess local needs to inform this new work programme.

Kidney disease

Acute kidney problems are common amongst our older patients, often resulting in admission to hospital and prolonged but preventable stays. Kidney problems can occur for a number of reasons including poor fluid intake, which can cause dehydration and make existing conditions such as heart problems, diabetes and hypertension worse. So, to help us meet our strategic priority of reducing unplanned care we have included kidney disease as one of our health programmes.

Neurological conditions

Services for Sefton residents with neurological conditions like Motor Neurone disease, Parkinson's disease, headaches and epilepsy need to improve. Because our population is ageing, we expect the number of people with these conditions to grow. The implications this will have on individuals, families, carers and health services will be significant. So, it is right that we should provide additional focus on this area as part of our strategic plan.

The right tools and systems for the job

Having the most up to date information systems and technologies is essential to providing the very best healthcare. As we work towards achieving health and social care services that are better joined up, this will be more vital than ever.

Information technology

Working with Informatics Merseyside and our service providers, we have made good progress towards ensuring our IT systems are fit for purpose and enable us to work seamlessly across different organisations. In the future, there will be an even greater need for our providers to share information to build an electronic healthcare record that will help to improve individual patient care. Our Merseyside wide programme called iLinks will help us to achieve this. We have also been working during the year with Southport and Ormskirk Hospital NHS Trust to increase usage of the national electronic referral booking system Choose and Book, making it easier for patients to make choices about where they receive treatment. All these systems are safe and secure and conform to the highest data protection safeguards and are essential in helping us to provide more care closer to home.

Managing our programmes effectively

We now have a well established Programme Management Office (PMO) which helps us to develop and monitor the main strategic programmes we have set out in our five year strategy. The PMO ensures programmes are developed systematically - from the planning stages, continuing right through the entire life of the scheme. It also contributes to providing assurance to our Governing Body about the performance of the services we commission, helping to spot trends and identify early any problems or issues.

Ensuring quality

Our Quality Committee is responsible for monitoring and overseeing performance against national requirements, including those in the NHS Constitution⁷, and local quality standards including patient safety and patient experience, as well as health and safety. To do this, the committee receives and assesses a wide range of data and information from the organisations we commission services from, as well as from inside the CCG. This work also reflects our commitment to ensuring we meet the recommendations contained in a number of important recent reviews such as Winterbourne and the Francis report.

Managing and responding to risks

Our Quality Committee provides the Governing Body with assurance that there are structures, systems and processes in place to identify and manage any significant risks that we may face. This helps us to ensure that local health services meet the highest possible standards of quality and patient safety. It also supports us in meeting our statutory duties as well as helping us to plan for a healthcare system which is robust and capable of dealing with unplanned events.

Our quality strategy

Every patient and person that we support can and should expect high quality care. This year our quality team developed a quality strategy, which underpins how we commission services to ensure they are amongst the safest and most effective in the NHS, provided reliably to every patient, every time. It also describes our approach to ensuring that everyone has the care and compassion they need and where they are empowered to have their voice heard. There are six fundamental values at the core of our strategy - care, compassion, competence, communication, courage and commitment - known as the 6Cs. These six areas support us in commissioning excellent care and promoting enduring positive values and behaviours across the local NHS. Our strategy also reflects our commitment to working in partnership with local residents, engaging with people to make choices about their health and care, and where there is 'no decision about me, without me'.

Promoting and using research to improve care

We understand that commissioning the best possible care for our residents, means that we must also be an organisation that promotes research and innovation and uses research evidence in designing and planning services. This will help us to achieve the best health outcomes and reduce the differences in health that exist across our diverse communities. Our research strategy was approved at the end of 2014 and this will ensure that our decisions around commissioning and transforming services are informed by the best available research and evidence. Our strategy also outlines our commitment to encouraging all our partners and providers in adopting this approach whenever possible to improve local healthcare and preventive services.

⁷ This brings together all the rights of our patients and staff <http://www.england.nhs.uk/2013/03/26/nhs-constitution/>

Improving Continuing Healthcare

Our quality team is leading a major piece of work to improve systems and decision making around continuing healthcare (CHC) assessments. CHC is the name given to packages of ongoing care, which are arranged and funded solely by the NHS, and where patients aged over 18 have a 'primary health need', as a result of disability, accident or illness. This is a highly complex area of healthcare for some of our most vulnerable patients and it requires specialist skills and knowledge to ensure effective decision making about each patient's eligibility and what ongoing care will be appropriate for their needs. During 2014-2015 we began to examine how we might streamline existing CHC structures, so the decision's made about a patient's eligibility and care happen much quicker.

Acting on our patients' experiences

Knowing what patients think of their care and treatment is an important way of understanding the quality of local health services - where they work well and where we need to work with providers to ensure they perform better to meet patients' expectations. Our Quality Committee gains information about patient experience in a number of different ways:

- We require our service providers to supply information about what patients think about the quality and safety of their healthcare – through their own **patient experience** surveys as well as the national Friends and Family Test
- We have a borough wide cross sector **Engagement and Patient Experience Group** (EPEG) jointly with NHS South Sefton CCG – this group reports to the Quality Committee and gathers patient experience information from Healthwatch Sefton and other independent sources including the voluntary, community and faith sector, and you can read more on page 37
- Our complaints policy and process – these reflect the national guidance, 'Principles for Remedy'⁸ and help us to identify trends and spot warning signs of any emerging problems. Our **patient experience team**, part of the commissioning support unit, provides help to people with any queries or concerns they have about their health or their treatment. The team also collects complaints, queries and concerns, and reports them to EPEG and our quality committee

All this information helps us to make improvements to existing services as well as helping us to shape our plans for the future.

Managing information about you

The Quality Committee also ensures that any information we hold about your care is held securely and in line with data protection legislation and wider Information Governance requirements. There were no data breaches in 2014-2015. If breaches do occur, we work hard to strengthen our systems, and our staff carry out regular training to ensure their work complies with national standards and regulations.

⁸ This guidance, issued by the Parliamentary and Health Ombudsman, focuses on six key areas of best practice <http://www.ombudsman.org.uk/improving-public-service/ombudsmansprinciples/principles-for-remedy>

Involving you

We believe that involving Southport and Formby residents in our work is fundamental to achieving better health and wellbeing. Our patients know the quality of existing health services from first hand experience, and the view of local people can help us to determine what more we need to do to achieve our aims.

Involving you in our daily business

We have a number of statutory responsibilities⁹ to make sure good, two way engagement and involvement is part of our daily business and our organisational structures reflect our commitment to this:

- We have a named **Governing Body lay member lead** for public engagement and involvement
- Our **Engagement and Patient Experience Group (EPEG)** reports to our Quality Committee. It is jointly chaired by our Governing Body lead and their counterpart from NHS South Sefton CCG, along with their elected practice manager leads. It includes representation from the patient's champion Healthwatch Sefton, Sefton Council and Sefton CVS, which represents the voluntary, community and faith sector. This group helps us to maximise the opportunities we have to engage across the different sectors in Sefton by working together in a coordinated way. EPEG gives expert advice about how and where to go to engage people. It collects the information we gather from all our engagement activities to inform our work, and patient experience to help us to gauge how effective our services are and where we can improve them. We have made progress in developing an electronic system to help us better manage the information we collect through EPEG and we expect this to be operational in 2015-2016. This will strengthen our internal systems, making it easier for us to turn people's views into service improvement
- Whenever it is appropriate, we invite **patient representatives** to get directly involved in our day to day work and in 2014-2015 this included groups to improve respiratory services, cancer and procurement exercises
- A number of GP practices in Southport and Formby have **patient groups**. We are providing support to help more practices to set up their own group. These groups enable patients to have their say about services at their practice and hear about our wider work
- We hold regular public **Big Chat** events where we bring people together to discuss our work, ask for their views about our plans and feedback how we have used people's comments and experiences so far. We also hold **Mini Chats** to really focus on specific topics and Healthwatch Sefton has led a number of **Community Chats** on our behalf to specifically help us in finalising our 5 year strategy
- Our **annual general meetings**, open to all residents, provide another opportunity for people to hear more about our work and how they can get involved

⁹ This includes the Health and Social Care Act, the NHS Constitution, the Equality Act 2010 and local council Overview and Scrutiny powers around service changes, along with guidance such as Transforming Participation in Health and Care and Everyone Counts – Planning for Patients

Your involvement in 2014-2015

There are a number of different ways that we involve local people in our work – from tapping into the strong voluntary, community and faith networks, to carrying out more focused work with specific communities or groups of people affected by our work. Here are some examples from 2014-2015.

Big Chat 4

Our fourth Big Chat in late November 2014 focused on moving our 'strategy into action'. It was also chance for people to hear how views from earlier Big Chats have been used to shape our 5 year strategy and people were invited to give their views on plans setting out our next steps. We shared our plans to develop a locality model of care – with GP practices and their patients at their core - based around our four geographical 'localities'. Working in this way allows practices in each locality to shape services that meet the distinct needs of the communities they serve. Our aim is to further strengthen this way of working, so that other services like district nursing and mental health are also more focused around localities. People at the Big Chats broadly agreed with the locality model. They talked about some of the other services that they would like to see delivered closer to home in their communities, and about those which they felt should be provided on a wider footprint, or in hospital. All the views we gained will help us to further shape our locality model. You will find reports for all our Big Chats on our website.

Practice patient groups

We believe that practice patient groups are a good way to involve our residents in their local NHS. They offer a chance for people to get involved in making improvements to their GP practice as well as offering a gateway to being involved in our wider CCG work. From 2015-2016, all GP practices will be required to establish a patient group as part of their contract with NHS England and many Southport and Formby surgeries already have well established and thriving groups. Over the past year we have been promoting practice patient groups at our events and a range of other meetings, encouraging people to get involved in theirs. In the year ahead we will be looking at how we might support those practices who do not already have a group to set up their own.

Systems to collect views and involve people

We have been developing two new electronic systems this year, which will help us to better involve people in our work and to ensure their views can more quickly inform our commissioning decisions. The first is a new database that stores contact information for all the people who have asked to be kept updated about our work, and in our day to day work we have been asking more residents if they would like to join. This system is already helping us to extend the number of people we are in contact with. The second system will record all the views and feedback we gain about services making it easier to spot trends and themes, so we can act quicker on people's information. Both of these systems hold information securely and safely and we expect them to be in full operation in 2015-2016.

Using experience to develop services

This year our commissioners have been working directly with patients, carers and their representatives on specific service areas. A good example of this is work to support our ophthalmology strategy. We invited the views of groups that represent people with visual impairments to further explore where we might provide more testing and treatments for eye conditions locally, rather than in hospital.

Breast care services review

With NHS West Lancashire CCG we spoke to breast care patients, carers, support groups and other interested parties between mid January to late February 2015 to gain their views and experience of these services at the range of local hospitals where people can choose to be treated. The exercise followed Southport and Ormskirk Hospital's decision to close its service to new patients from 1 September 2014 because it could no longer be provided safely due to recruitment issues. As well as gaining views to help shape future services, this was a chance to more fully discuss the hospital's decision for closing its service and the actions we are taking as a result to address some of the concerns of existing patients. We attended a number of events across the area and we also spoke directly to breast care patients, inviting their feedback at a number of different out patient clinics during the period. This generated more than 3,500 contacts and we will be feeding back the results in 2015-2016.

Patient experience team

Part of the commissioning support unit, this team is there to help people with any queries or concerns they have about their health or their treatment. It offers a Freephone telephone number - 0800 218 2333 – and last year 546 Southport and Formby residents used this service. The team helped people to find information about local dentists, access GP services and patient transport, resolve individual issues and provided general health information. The team also supported our Breast Care Services review, dealing with 119 enquiries about this exercise.

Equality and diversity

Promoting equality is at the heart of everything we do. We want to ensure that we commission services fairly, so that no community or group is left behind in the changes that we make to health services as we work towards the vision set out in our 5 year strategy and the NHS England's 'Five Year Forward View'.

We will continue to work internally, and in partnership with our providers, community and voluntary sector and other key organisations to ensure that we advance equality of opportunity and meet our exacting requirements of the Equality Act 2010.

Our duties

The Equality Act requires us to meet our Public Sector Equality Duty (PSED) across a range of protected groups including age, gender, race, sex, sexual orientation, religion and belief, gender identity, marital and civil partnership status and pregnancy and maternity status. Failure to pay due regard to and comply with our duties has legal, financial and reputational risks. So, we must demonstrate that the needs of protected groups have been considered in all aspects of our work – from commissioning and procuring services, consulting and engaging local people and setting quality performance measures, to our internal governance systems and how we treat our staff.

Our equality objectives

We are required to prepare and publish equality objectives to meet our specific duty set out in the Equality Act. Our plan is specific and measurable and it is updated on an annual basis. We understand that at sometimes in our lives we may face barriers when accessing health services or experience different outcomes than what we would expect. So, we want to reduce the health differences across our diverse communities and our equality objectives will support us in doing this:

They are:

- To make fair and transparent commissioning decisions
- To improve access and outcomes for patients and communities who experience disadvantage
- To improve the equality performance of our providers through robust procurement and monitoring practice
- To empower and engage our workforce

Equality delivery systems 2

To help us set our equality objectives we are currently undertaking equality delivery systems 2 (EDS 2). We have been assessed as 'developing', reflecting the need to fully embed equality and diversity. We are now working to improve our performance around the following EDS 2 indicators over the next two years:

- Services are commissioned, procured, designed and delivered to meet the health needs of local communities
- People, carers and communities can readily access hospital, community health or primary care services and should not be denied access on unreasonable grounds
- Papers that come before the Governing Body and other major Committees identify equality-related impacts including risks, and say how these risks are to be managed

We will know the outcomes and recommendations of this assessment in June 2015.

Our service providers

All our key NHS providers have undertaken the EDS 2 assessment and have set equality objectives in line with their requirements. We are working closely with our providers to improve equality performance, access and outcomes for protected groups through robust contract monitoring.

Responding to other new duties

We are also working towards the new National Workforce Race Standard. This aims to address the lack of black and minority ethnic (BME) representation at senior levels in the NHS to galvanise cultural and organisational change. The standard, underpinned by commissioning and regulatory action, will also help to address the treatment of BME staff including adverse outcomes throughout recruitment and promotion, access to non-mandatory training, over-representation in disciplinary procedures, bullying and harassment. The new standard supports the vision set out in the Five Year Forward View and the need to ensure NHS workforces experience inclusive and non-discriminatory opportunities.

Working sustainably

Sustainability has become increasingly important as the impact of peoples' lifestyles and business choices are changing the world in which we live. We acknowledge this responsibility to our patients, local communities and the environment by working hard to minimise our footprint.

As part of the 2013 authorisation process, CCGs have self-certified compliance to the statement: "We declare that at the point of authorisation our CCG will demonstrate commitment to promoting environmental and social sustainability through our actions as a corporate body as well as a commissioner."

Policies

In order to embed sustainability within our business it is important to explain where in our process and procedures sustainability features.

Area	Is sustainability considered?
Commissioning (environmental)	Yes
Commissioning (social impact)	Yes
Suppliers' impact	Yes
Travel	No

One of the ways in which an organisation can embed sustainability is through the use of a sustainable development management plan (SDMP). We will be putting together an SDMP in the near future for consideration by the board. As an organisation that acknowledges its responsibility towards creating a sustainable future, we help achieve that goal by running awareness campaigns that promote the benefits of sustainability to our staff. Climate change brings new challenges to our business both in direct effects to the healthcare estates, but also to patient health. Examples of recent years include the effects of heat waves, extreme temperatures and prolonged periods of cold, floods, droughts etc. Our board approved plans address the potential need to adapt the delivery the organisation's activities and infrastructure to climate change and adverse weather events

Partnerships

As a commissioning and contracting organisation, we will need effective contract mechanisms to deliver our ambitions for sustainable healthcare delivery. The NHS policy framework already sets the scene for commissioners and providers to operate in a sustainable manner. Crucially for us as a CCG, evidence of this commitment will need to be provided in part through contracting mechanisms.

For commissioned services here is the sustainability comparator for our largest providers: ¹⁰:

Organisation Name	Sustainable Development Management Plan	Good Corporate Citizen Tool	Board Lead for Sustainability	Adaptation	Sustainable Development Reporting score
Aintree University Hospital NHS Foundation Trust	Yes	No	Yes	Yes	Good
Alder Hey Children's NHS Foundation Trust	Yes	No	No	No	Good
Southport and Ormskirk Hospital NHS Trust	Yes	No	Yes	No	Poor
Royal Liverpool and Broadgreen University Hospitals NHS Trust	Yes	Yes	Yes	Yes	Minimum
Liverpool Heart and Chest Hospital NHS Foundation Trust	No	No	Yes	Yes	Poor
Mersey Care NHS Trust	No	No	Yes	No	Good

As a part of the NHS, public health and social care system, it is our duty to contribute towards the level of ambition set in 2014 of reducing the carbon footprint of the NHS, public health and social care system by 34% (from a 1990 baseline) equivalent to a 28% reduction from a 2013 baseline by 2020. It is our aim to meet this target by reducing our carbon emissions 10% by 2015 using 2007 as the baseline year.

We have a small workforce and a small headquarters, so we are a relatively low carbon emitting organisation. We lease our office in Southport, and we will work with the owners of the building to provide required information about carbon emissions in future years.

¹⁰ More information on these measures is available here: <http://www.sduhealth.org.uk/policy-strategy/reporting/sdmp-annual-reporting.aspx>

Being prepared for emergencies

We have a role to play in supporting the management of emergencies such as major incidents, or natural events like flooding and pandemic flu. Our duties are set out in the Civil Contingencies Act 2004, which names CCGs as 'Category 2' responders. This means we are required to share information and cooperate with other agencies in planning for and responding to emergencies should they happen.

Like Category 1 responders, such as the police, fire service and Sefton Council, we must also produce plans to help us to assess risk and ensure that arrangements are in place for informing and warning the public should this be necessary. The NHS Core Standards for Emergency Planning, Response and Resilience further requires us to ensure that our service providers have plans in place to respond to and recover from emergencies.

We gain operational support in meeting our duties from North West Commissioning Support Unit through its Emergency Planning, Response and Resilience Team. Here are some of the ways we met our duties in 2014-2015:

- We are part of the Local Resilience Forum and the Local Health Resilience Partnership – which bring a wide range of agencies together to plan for and coordinate the management of emergencies
- We work with CCGs and service providers across Merseyside to ensure the healthcare system can respond to incidents night and day – we have a 24/7 on call system, so service providers and other agencies can contact us round the clock in the event of emergencies
- We have developed Business Continuity and Incident Response Plans - as well as making sure our own plans are robust, we monitor the plans of our service providers
- Our staff take part in regular training sessions and exercises – so we have the skills and experience to deal with unexpected incidents

Continuing to develop and grow

We want to ensure that NHS Southport and Formby CCG remains to be an effective and innovative organisation into the future. To do this we must continually grow and develop our knowledge and skills in line with the latest developments in healthcare and technologies.

One of our most important documents is our organisational development plan, which was agreed by the Governing Body. It was informed by earlier work with members and staff to assess areas for development and focuses on six themes:

- Leadership, workforce and team development
- Public and patient communication and engagement
- Locality development
- Strategy and performance development
- Improving functionality
- Values, style of working and change management

Going forward into 2015-16, the development of our locality model is the priority area for organisational development and a plan is in place for implementation over the next six to 12 months.

Our Governing Body

Our Governing Body participates in monthly development sessions, either alone or with NHS South Sefton CCG, which provide an opportunity for reflection on national and local developments to inform our strategy and how it is delivered. Governing Body members have also been able to access a range of personal development opportunities, with some participating in national development programmes or network events with other CCGs.

Our members

Our member practices are supported to carry out their commissioning responsibilities in a number of different ways.

- Continuing professional development sessions are regularly organised for clinical staff and these are called Protected Learning Time (PLT) events
- Our two nurse facilitators plan and support the development and access to education, training and mentoring for practice nurses and healthcare assistants
- We hold quarterly membership meetings where practices come together to discuss wider CCG work
- A weekly e-bulletin provides members with updates on CCG work, along with relevant national publications and development opportunities
- An intranet site provides a wide range of information designed to support our members, which we will be updating in 2015-2016 based on member's feedback

Our staff

At the end of March 2015 we employed 93 people (32 whole time equivalents) to help us to carry out our work. This includes commissioning and medicines management professionals, doctors, nurses and a small number of administration and support staff. Nearly all of our staff work jointly with NHS South Sefton CCG through our shared management team arrangements. We also have a small number of joint appointments with Sefton Council.

	Governing Body	Very Senior Managers	Other employees
Male	9	0	25
Female	5	0	54
Total	14	0	79

Our staff also continue to access a broad range of development programmes relevant to their roles to assist them in their day to day work:

- We are committed to being a fair and equal employer and our workplace policies are in line with all relevant equality, diversity and human rights legislation to ensure none of our staff are disadvantaged by our working, training or recruiting processes
- Because we are a small team, we are able to meet regularly to discuss business and performance, and to share ideas and innovation
- We ensure our staff have the resources and development opportunities to help them carry out their day to day work, including support to complete essential core training requirements, holding regular personal development reviews, promoting and providing staff support and occupational health services focusing on health and wellbeing, as well as ensuring easy access to information through our intranet and weekly ebulletins

Our performance

To make sure we fulfil all our duties, our performance is regularly measured, monitored and scrutinised. This happens in a number of different ways - through our internal structures and processes as described earlier in this report, as well as being regularly assessed by NHS England.

There are also a number of documents that set out targets for different areas of our work. This includes the pledges contained in the NHS Constitution, the NHS Outcomes Framework and local measures developed in line with Everyone Counts – national guidance for CCGs on planning for patients. We have set these local quality measures ourselves. These have been determined by the needs of Southport and Formby residents and focus on where we need to make improvements in very local and specific areas.

Overall, we performed well in 2014-2015 and the work you have been reading about so far in this report has all contributed to this.

An overview of performance follows¹¹. More detailed information can be found in the reports presented to our Governing Body at each of its public meetings¹².

¹¹ This overview of performance is based on data available at the time of writing this report, covering the period April 2013 – end February 2014

¹² All performance reports presented to the Governing Body can be found on our website www.southportformbyccg.org.uk

Performance in health

Nearly all of these measures depend on how well the organisations we commission services from are performing. Where they fall short of expectations, we work with them to improve and this sometimes includes contractual measures to ensure our services meet the best possible standards¹³.

Performance Indicator	Source of measure and performance status (RAG)
Incidence of healthcare associated infection (HCAI) C.difficile	Outcomes Framework
Patient experience of primary care i) GP Services, ii) Out of Hours Services	Outcomes Framework
Emergency admissions for children with Lower Respiratory Tract Infections (LRTI)	Outcomes Framework
Rate of potential years of life lost (PYLL) from causes considered amenable to healthcare 2013 (Persons)	Outcomes Framework
Maximum two-week wait for first outpatient appointment for patients referred urgently with suspected cancer by a GP	Constitution
Maximum two-week wait for first outpatient appointment for patients referred urgently with breast symptoms (where cancer was not initially suspected)	Constitution
Maximum one month (31-day) wait from diagnosis to first definitive treatment for all cancers	Constitution
Maximum 31-day wait for subsequent treatment where the treatment is a course of radiotherapy	Constitution
Maximum 31-day wait for subsequent treatment where that treatment is surgery	Constitution
Maximum 31-day wait for subsequent treatment where that treatment is an anti-cancer drug regimen	Constitution
Maximum 62-day wait for first definitive treatment following a consultant's decision to upgrade the priority of the patient (all	Constitution

¹³ Note: This overview of performance is based on data available at the time of writing this report, covering the period April 2014 - end of January 2015. Further information on these indicators, along with the full year performance can be found in the Integrated Performance report of the Governing Body papers, which are available on our website.

cancers)	
Maximum 62-day wait from referral from an NHS screening service to first definitive treatment for all cancers	Constitution
Maximum two month (62-day) wait from urgent GP referral to first definitive treatment for cancer	Constitution
Mixed Sex Accommodation (MSA) Breaches per 1,000 Finished Consultant Episodes	Constitution
Admitted patients to start treatment within a maximum of 18 weeks from referral	Constitution
Non-admitted patients to start treatment within a maximum of 18 weeks from referral	Constitution
Patients on incomplete non-emergency pathways (yet to start treatment) should have been waiting no more than 18 weeks from referral	Constitution
Percentage of patients who spent 4 hours or less in A&E	Constitution
% of patients waiting 6 weeks or more for a Diagnostic Test	Constitution
Friends and Family Test Scores: Maternity	Outcomes Framework
Ambulance clinical quality – Category A (Red 1) 8 minute response time (North West)	Constitution
Ambulance clinical quality – Category A (Red 2) 8 minute response time (North West)	Constitution
Ambulance clinical quality - Category 19 transportation time (North West)	Constitution
Local Quality Premium measure: proportion of diabetes patients who receive all 9 diabetes care processes	Local Measure
Incidence of healthcare associated infection (HCAI) MRSA	Outcomes Framework
Emergency Admissions Composite Indicator (and supporting measures)	Outcomes Framework
Increasing Access to Psychological Therapies (IAPT) (Prevalence & Recovery)	Outcomes Framework
Patient Reported Outcome Measures (PROMS): Groin Herina, Hip and	Outcomes Framework

Knee Replacement (2012/13)	
Emergency admissions for acute conditions that should not usually require hospital admission	Outcomes Framework
Friends and Family Test Scores: A&E	Outcomes Framework
Friends and Family Test Scores: Inpatients	Outcomes Framework
Under 75 mortality rate from cancer	Outcomes Framework (120.2)
Under 75 mortality rate from cardiovascular disease	Outcomes Framework (57.5)
Under 75 mortality rate from liver disease	Outcomes Framework (15.8)
Under 75 mortality rate from respiratory disease	Outcomes Framework (22.3)

Providing value

Financial performance overview

The following summary financial statements set out the performance of NHS Southport and Formby CCG during the financial year 2014-15. For a full understanding of our financial position and performance, a full set of financial statements is available on request from the Chief Finance Officer (please phone 0151 247 7071).

We are pleased to report that all of our statutory financial duties 2014-15 have been achieved, notably:

- Achieved 'operational financial balance' and reported a revenue surplus of £1.750m which is carried forward for investment in future years;
- Managed within our cash limits;
- Operated within our running cost allowance (administrative cost budget set by NHS England).

Analysis of funding and expenditure

We received £173.264m of parliamentary revenue funding in 2014-15. We carried forward £1.750m of this forward for future year investment in healthcare services, and we spent the remaining £171.514m as follows.

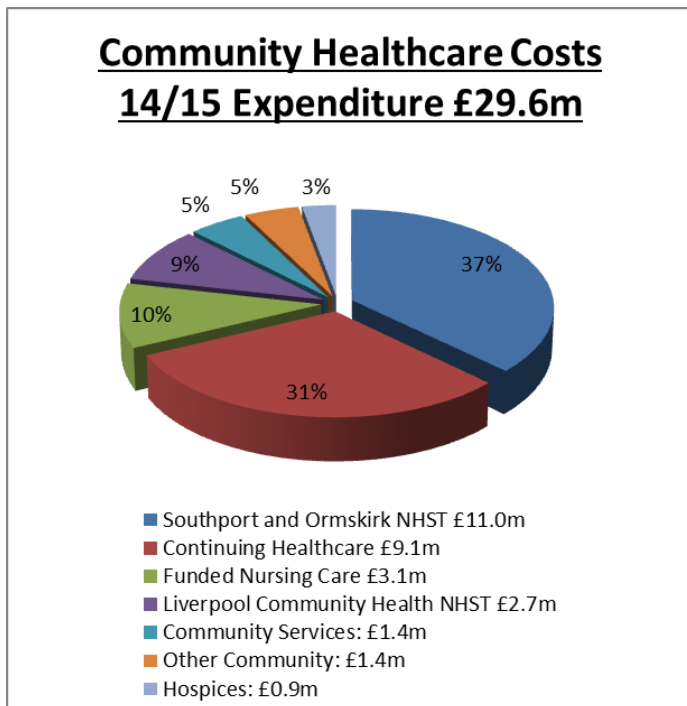

Our main areas of spend were as follows;

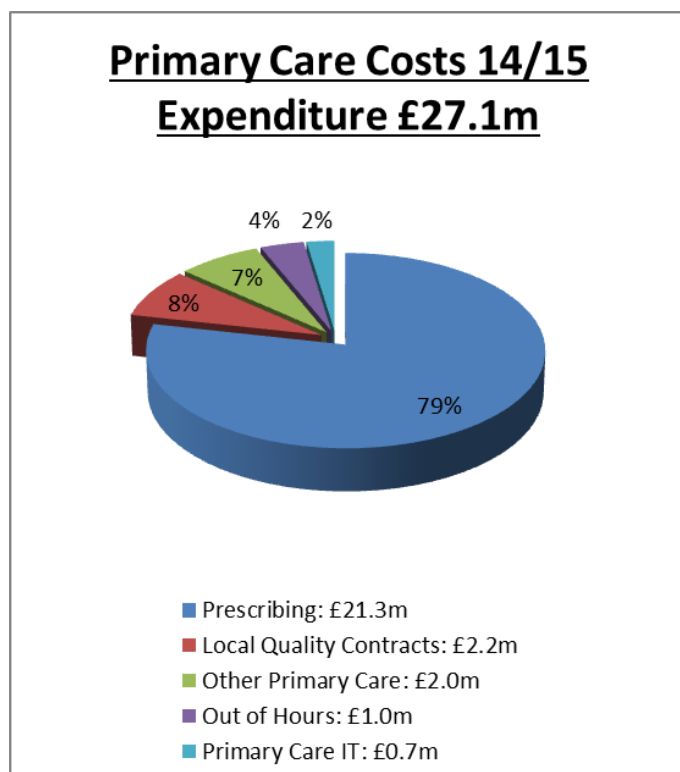

Secondary healthcare - represents the cost of contracts we have with hospitals to provide services for the residents in our community. Examples of these services include accident and emergency, maternity, mental illness and general and acute services. A breakdown of this spend by provider is shown below.

Community healthcare - is the cost of services provided in a community setting. Examples of this are district nursing, physiotherapy and community clinics. It also includes the cost of providing long term packages of care for people at home and in nursing and residential homes. A breakdown of this spend is shown below.

Primary care costs - mainly represent the cost of drugs prescribed by GPs. They also include some other services commissioned from GPs and primary care contractors (eg Out of Hours services). A breakdown of this spend is shown below.

Other programme costs - mainly consist of non-acute services such as re-ablement schemes and other mental health services, as well as front line IT schemes.

Administration - represents the departments that support the process of commissioning the healthcare services described above. By understanding the needs of our community, we strive to obtain high quality and valued services. We also ensure management of those contracts throughout the lifecycle of a service is of the highest possible standards. These costs represent just 1.7% of the CCG's overall budget.

The following summary statements show the key financial reports for the CCG.

Statement of comprehensive net expenditure (summary)

£000's	2014-15			2013-14		
	Admin	Programme	Total	Admin	Programme	Total
Employee Benefits	1,266	537	1,803	1,003	347	1,350
Operating Expenses	1,691	168,924	170,615	1,622	168,025	169,647
Other operating revenue	0	(905)	(905)	0	(866)	(866)
Net Operating expenditure	2,957	168,557	171,514	2,625	167,506	170,131

This financial statement shows our total net expenditure split between direct healthcare spend (programme) and administrative spend.

Statement of financial position (summary)

£000's	2014-15	2013-14
Non Current Assets	34	45
Current Assets	1,131	6,752
Total Assets	1,165	6,797
Current Liabilities	(12,466)	(13,198)
Non Current Assets less Net Current Liabilities	(11,301)	(6,401)
Non-Current Liabilities	(498)	0
Assets less Liabilities	(11,799)	(6,401)
Total Taxpayers Equity	(11,799)	(6,401)

The statement of financial position provides a snapshot of the CCG's assets and liabilities as at 31 March 2015. The negative balance reported against total taxpayers equity is a consequence of timing payments as opposed to any adverse financial performance.

Statement of changes in taxpayers equity for the year ended 31 March 2015 (Summary)

£'000s	Total Reserves
Balance at 1st April 2014	(6,401)
Changes in NHS CCG Taxpayers Equity for 2014-15	
Net Operating Expenditure for the financial year	(171,514)
Net Recognised NHS CCG Expenditure for the Financial Year	(177,915)
Net Funding	166,117
Balance at 31 March 2015	(11,799)

This statement reflects the gains or losses that have not been reflected in the operating cost statement.

Statement of cash flows for the year ended 31 March 2015 (summary)

£'000s	2014-15	2013-14
Cash Flows from Operating Activities		
Net Operating Expenditure for the financial year	(171,514)	(170,131)
Depreciation and Amortisation	12	20
(Increase)/Decrease in trade and other receivables	5,561	(6,613)
Increase/(Decrease) in trade and other payables	(732)	13,198
Increase/(Decrease) in Provisions	498	0
Net Cash Inflow / (Outflow) from Operating Activities	(166,176)	(163,526)
Net Cash Inflow / (Outflow) from Investing Activities	0	0
Net Cash Inflow / (Outflow) before Financing	(166,176)	(163,526)
Cash Flows from Financing Activities		
Grant Aid Funding Received	166,117	163,664
Net Cash Inflow / (Outflow) from Financing Activities	166,117	163,664
Net Increase / (Decrease) in Cash and Cash Equivalents	(59)	138
Cash and Cash Equivalents at the Beginning of the Financial Year	138	0
Cash and Cash Equivalents at the End of the Financial Year	79	138

This statement explains the movements in cash balances during the financial year.

Better Payment Practice Code

	2014-15		2013-14	
	Number	Value	Number	Value
Non NHS Payables	92.0%	90.0%	87.3%	86.4%
NHS Payables	91.5%	98.4%	83.8%	99.5%

We are required to pay all trade creditors in accordance with the national Better Payment Practice Code (BPPC). The target is to pay relevant creditors within 30 days of receipt of goods or a valid invoice unless other payment terms have been agreed with the supplier. The CCG is a signatory to the Prompt Payment Code, details of which can be seen at www.promptpaymentcode.org.uk. The CCG is striving to improve its performance to ensure that it meets its targets in the future.

Pensions liabilities

The full financial statements and accompanying notes and policies provide full details of the pension scheme.

PwC are the auditors of NHS Southport and Formby CCG and the fees charged for 2014-15 were £60,000 (exc' VAT). No further fees were payable for additional, non-statutory work.

Members' report

This section gives you more information about our Governing Body, member practices and staff. It also details the composition of our most important committees.

Our member practices

Here is a list of the practices which make up our organisation.

Name of member practice ¹⁴
Cumberland House Surgery
Curzon Road Medical Practice
St Marks Medical Centre
Kew Surgery
Trinity Practice
Chapel Lane Surgery
The Village Surgery
Freshfield Surgery
The Hollies
Norwood Surgery
Churchtown Medical Centre
Roe Lane Surgery
The Corner Surgery
Marshside Surgery
Ainsdale Medical Centre
Ainsdale Village Surgery
Grange Surgery
Lincoln House Surgery
The Family Surgery

Pension liabilities

Our past and present employees are covered by the provisions of the NHS Pension Scheme. The NHS Pension Scheme is an unfunded, defined benefit scheme that covers all NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme's assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme - the cost to the CCG of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period. The scheme is subject to a full actuarial valuation every four years and an accounting valuation every year. Further details of the accounting treatment of pension contributions by the CCG can be found in the accounting policy note in our accounts. Details of pension benefits for senior managers can be found in the Remuneration Report.

¹⁴ This reduced from 20 practices in 2013-2014 to 19 in 2014-2015, with the consolidation of Sussex Rd Surgery into Curzon Rd Practice following retirement of sole principal GP

Governing Body membership

The table below shows the people who made up our Governing Body in 2014-2015, their roles and the committees¹⁵ they were a part of.

Name	Role	Governing Body	Audit Committee	Finance and Resources Committee	Remuneration Committee	Quality Committee	Service Improvement and Redesign Committee
Dr Rob Caudwell	Chair and Clinical Director	Yes			Yes	Chair	
Dr Niall Leonard	Clinical Vice Chair and Clinical Director	Yes					Yes
Paul Ashby	Practice Manager and Governing Body Member	Yes	Yes		Yes	Yes	
Dr Doug Callow	GP Clinical Director and Governing Body Member	Yes				Yes	
Fiona Clark	Chief Officer	Yes		Ex officio member		Ex officio member	
Dr Martin Evans	GP Clinical Director and Governing Body Member	Yes		Yes	Yes		
Debbie Fagan	Chief Nurse	Yes		Yes		Yes	
Martin McDowell	Chief Finance Officer	Yes		Yes		Yes	
Dr Hilal Mulla	GP Clinical Director and Governing Body Member	Yes		Yes			
Helen Nichols	Vice Chair and Lay Member for Governance	Yes	Chair	Chair	Chair	Yes	

¹⁵ More details about members of the Governing Body and any conflicts of interest can be found on page 66 in the Remuneration Report. The membership of our other committees and sub-committees can be found on page 70 onwards in our annual Governance Statement.

Roger Pontefract	Lay Member for Patient & Public Engagement	Yes	Yes	Yes	Yes	
Colette Riley	Practice Manager and Governing Body Member	Yes			Yes	Yes
Dr Kati Scholtz	GP Clinical Director and Governing Body Member	Yes				Yes up to Sep 14
Dr Jeff Simmonds	Secondary Care Doctor and Governing Body Member	Yes				Yes

External auditors

Our external auditor is PricewaterhouseCoopers LLP. During 2013-2014 the external auditor has received fees totalling £60,000 as a result of undertaking the following work:

- Audit services - the statutory audit and services carried out in relation to the statutory audit, fee £60,000
- Further assurance services – nil
- Other services – nil

Disclosure of serious untoward incidents

In 2014-2015, we had no serious untoward incidents involving the loss of personal data or confidentiality breaches to declare to the Care Quality Commission or to the Information Commissioner's Office.

Health and safety

We are a low risk organisation with a positive health and safety culture. We have effective policies and procedures in place, which helps us to set and maintain sensible and proportionate standards of health and safety management. This ensures we effectively support the wellbeing of our staff and others who may be affected by our activities, and to minimise the losses to our organisation from ill health and injury.

Principles for Remedy

We have designed our complaints policy and other internal processes to fully take account of the national guidance, 'Principles for Remedy' issued by the Parliamentary and Health Ombudsman and the six areas of best practice it outlines.

Sickness absence rates

Rates of sickness absence in our organisation are low. Our annual rolling sickness absence at the end of March 2014 was 6.1%. We have policies in place that set out how we manage and support staff through periods of illness or other types of leave.

Employee consultation

We are active members of the Cheshire and Merseyside Staff Partnership Forum, bringing us together with staffside representatives to foster positive two way employee relations. This committee is authorised to agree, revise and review policies and procedures which may relate to changes affecting our staff around employment legislation and regulation or the terms and conditions of their employment.

Disabled employees

We ensure our disabled staff are treated equality, without discrimination and shown due regard. More information can be found on pages 40 and 46.

Remuneration report

The Remuneration Committee membership is made up of five Governing Body Members. The committee has met once during the year (November 2014). No fee was paid for this advice.

Name	Title	Membership Period	Attendance at Meetings eligible to attend
Helen Nichols	Chair and Governing Body Lay Member	All Year	1/1
Roger Pontefract	Governing Body Lay Member	All Year	1/1
Robert Caudwell	GP and Clinical Vice Chair of Governing Body	All Year	1/1
Martin Evans	GP and Governing Body Member	All Year	1/1
Paul Ashby	Practice Manager and Governing Body Member	All Year	1/1

Policy on remuneration of senior managers

In the absence of national guidance, we worked with other CCGs in the North West and commissioned the Hay Group to provide guidance on appropriate remuneration for the GP, Practice Manager and Lay members of our Governing Body.

In developing this guidance the Hay Group used the following principles:

- A simple approach
- Promotes consistency across the region.
- Allows CCGs to recruit and retain the expertise and calibre of individuals they need, now and in the future.
- Is clear and defensible to stakeholders, media and the public.
- Recognises that not all Board member contributions have the same value.
- Reflects the commitment and risk involved for individuals and the disruption involved for practices.
- Offers value for money, supporting policy objectives at minimum and controllable cost.

The NHS Commissioning Board issued guidance on the remuneration of chief officers and chief finance officers. This guidance has been followed in setting the remuneration of the CCG's chief officer and chief finance officer.

The performance of senior managers is measured using our personal development review policy, which is used for all employees.

Both NHS England and the Hay Group guidance took the pay and employment conditions of other employees into account when determining the framework for senior manager's remuneration. The terms and conditions of service for all NHS staff, except very senior managers (VSMs) are nationally agreed by the NHS Staff Council. These terms and conditions include, pay and allowances; terms of employment such as leave and hours of working; the process for ensuring effective employee relations; and regulations with regard to equality and diversity.

NHS staff pensions are covered separately under the NHS rules on superannuation. In essence, individuals who are employed by the NHS automatically become a member of the NHS Pension Scheme. However, membership is voluntary and individuals can currently opt not to join and leave the scheme at any time.

In line with other CCGs, all employees other than very senior managers who have transferred to the CCGs from one of the former PCTs (under a Transfer Scheme/Order) have transferred on the same terms and conditions as they were previously on.

Senior managers' performance related pay

Senior managers' performance is managed through the application of our personal development review (PDR) policy. This process ensures all staff have a clear understanding of their duties, responsibilities and objectives and their development needs are formally identified. The NHS Framework forms the basis of the PDR process, supporting career and pay progression.

Policy on senior managers' service contracts

Our policy is that all senior manager contracts are in line with Agenda for Change (AfC). There is no fixed duration and there are no provisions for termination payments within the contract. Consequently there are no senior managers that hold a fixed duration contract nor do we have any liability in terms of potential future termination payments.

Payments to past senior managers

We have not made any significant awards to past senior managers.

Salaries and allowances

The table below sets out the salaries and allowances we have paid, or that are payable to our Senior Managers in 2014-15.

Senior managers are defined in the Government Financial Reporting Manual as 'those persons in senior positions having authority or responsibility for directing or controlling our major activities. This means those who influence the decisions of the CCG as a whole rather than the decisions of individual directorates or departments. Such persons will include advisory and lay members'.

Name and Title	Salary & Fees	Taxable Benefits	Performance Pay and bonuses	Long Term Performance Pay and Bonuses	All Pension Related Benefits	Total	Prior Year Total

We have a joint management arrangement with neighbouring NHS South Sefton CCG. The chief officer (Fiona Clark), chief financial officer (Martin McDowell) and chief nurse (Debbie Fagan) receive remuneration for undertaking these roles for both CCGs. Their total banded remuneration from these roles is:

- Fiona Clark £125,000 to £130,000 and £5,000 to £7,500 all pension related benefits
- Martin McDowell £100,000 to £105,000 and £12,500 to £15,000 all pension related benefits
- Debbie Fagan £75,000 to £80,000 and £25,000 to £27,500 all pension related benefits

The figures for pensions reflect a change to the calculation of pension entitlement between the opening and closing entitlements multiplied by 20. This can result in large pension related benefits being shown in the remuneration table report.

The total remuneration of our chief officer and chief financial officer includes a 20% supplement on their basic salary paid in accordance with NHS England guidance and agreed by our Remuneration Committees to recognise the joint roles that they undertake, as officers covering two CCGs. They hold the same positions with NHS South Sefton CCG.

Pension benefits

Name and Title	Real increase in pension at age 60	Real increase in pension lump sum at age 60	Total accrued pension at age 60 at 31st March 2015	Lump sum at age 60 related to accrued pension at 31st March 2015	Cash equivalent transfer value at 1 st April 2014	Cash equivalent transfer value at 31st March 2015	Real increase in cash equivalent transfer value	Employers contribution to stakeholder pension
	(bands of £2,500)	(bands of £2,500)	(bands of £5,000)	(bands of £5,000)	£000	£000	£000	£000
	£000	£000	£000	£000	£000	£000	£000	£000

Debbie Fagan Chief Nurse	0-2.5	5-7.5	20-25	70-75	343	379	37	0
Dr Robert Caudwell Chair & GP Clinical Director	5-7.5	20-22.5	5-10	25-30	26	115	88	0

The information in the table above for our chief officer (Fiona Clark), chief finance officer (Martin McDowell) and chief nurse (Debbie Fagan) relates to their total pension benefits arising from their roles in both CCGs.

Certain members do not receive pensionable remuneration therefore there will be no entries in respect of pensions for certain members.

Cash Equivalent Transfer Values

A Cash Equivalent Transfer Value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular point in time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. A CETV is a payment made by a pension scheme or arrangement to secure pension benefits in another pension scheme or arrangement when the member leaves a scheme and chooses to transfer the benefits accrued in their former scheme. The pension figures shown relate to the benefits that the individual has accrued as a consequence of their total membership of the pension scheme, not just their service in a senior capacity to which disclosure applies. The CETV figures and the other pension details include the value of any pension benefits in another scheme or arrangement which the individual has transferred to the NHS pension scheme. They also include any additional pension benefit accrued to the member as a result of their purchasing additional years of pension service in the scheme at their own cost. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries.

Real increase in CETV

This reflects the increase in CETV effectively funded by the employer. It takes account of the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another scheme or arrangement) and uses common market valuation factors for the start and end of the period.

Pay multiples

Reporting bodies are required to disclose the relationship between the remuneration of the highest paid director in their organisation and the median remuneration of the organisation's workforce.

The banded remuneration of the highest paid member of the Governing Body in NHS Southport and Formby CCG in the financial year 2014-15 was £125,000 to £130,000. (2013-14: £125,000 to £130,000)

This was 3.61 times (2013-14: 3.11) the median remuneration of the workforce, which was £34,877. (2013-14: £40,558).

In 2014-2015, no employees (2013-14: 0) received remuneration in excess of the highest paid member of the Governing Body. Banded Remuneration ranged from £5,000 to £10,000 (2013-14, £5,000 to £10,000) to £125,000 to £130,000 (2013-14, £125,000 to £130,000).

Total remuneration includes salary, non-consolidated performance related pay and benefits in kind. It does not include severance payments, employer pension contributions and the cash equivalent transfer value of pensions.

Off payroll engagements

Off payroll engagements as of 31 March 2014, for more than £220 per day and that last longer than six months are as follows:

The number that have existed:	Number
• For less than one year at the time of reporting	1
• For between one and two years at the time of reporting	0
• For between two and three years at the time of reporting	0
• For between three and four years at the time of reporting	0
• For four or more years at the time of reporting	0
Total number of existing engagements as of 31 March 2015	1

All existing off payroll engagements, outlined above, have at some point been subject to a risk based assessment as to whether assurance is required that the individual is paying the right amount of tax and, where necessary, that assurance has been sought.

	Number
Number of new engagements, or those that reached six months in duration, between 1 April 2014 and 31 March 2015	1
Number of the above which include contractual clauses giving the clinical commissioning group the right to request assurance in relation to Income Tax and National Insurance obligations	1
Number for whom assurance has been requested	1
Of which, the number:	
• For whom assurance has been received	1
• For whom assurance has not been received	0
• That have been terminated as a result of assurance not being received	0

	Number
Number of off-payroll engagements of Membership Body and/or Governing Body members, and/or, senior officials with significant financial responsibility, during the financial year	0
Number of individuals that have been deemed "Membership Body and/or Governing Body" members, and/or, senior officials with significant financial responsibility", during the financial year (this figure includes both off-payroll and on-payroll engagements)	14

Governing body profiles

The table below sets out for the Governing Body members the declared interests and conflicts together with the date declared. Details of Committees that individual Governing Body member's were a member of during the year can be found in the Members Report.

Certifications by our accountable officer

We certify that the strategic report, members' report and remuneration report presented as part of the CCG's Annual Report have been prepared in accordance with the guidance contained in the NHS England Annual Accounts Guidance 2014-15 issued on 23 March 2015 and the Department of Health Group Manual for Accounts updated March 2015.

We certify that the CCG has complied with the statutory duties laid down in the NHS Act 2006 (as amended).

We certify that the classification as a senior manager as defined by the Government Financial Reporting Manual, only extends to membership of the CCGs Governing Body.

We certify that the CCG has complied with HM Treasury's guidance on cost allocation and the setting of charges for information.

We certify that the CCG has incident response plans in place, which are fully compliant with the NHS Commissioning Board Emergency Preparedness Framework 2013. The CCG regularly reviews and makes improvement to its major incident plan and has a programme for regularly testing this plan, the results of which are reported to the Governing Body.

Each individual who is a member of the Governing Body at the time that the members' Report is approved confirms:

- So far as the member is aware, that there is no relevant audit information of which the CCG's external auditor is unaware: and,
- That the member has taken all the steps that they ought to have taken as a member in order to make them self aware of any relevant audit information and to establish that the CCG's auditor is aware of that information.

Fiona Clark

Chief Officer (Accountable Officer)

NHS Southport and Formby CCG

May 2015

Statement of accountable officer's responsibilities

The National Health Service Act 2006 (as amended) states that each clinical commissioning group shall have an accountable officer and that Officer shall be appointed by the NHS Commissioning Board (NHS England). NHS England has appointed the chief officer to be the accountable officer of the clinical commissioning group.

The responsibilities of an accountable officer, including responsibilities for the propriety and regularity of the public finances for which the accountable officer is answerable, for keeping proper accounting records (which disclose with reasonable accuracy at any time the financial position of the clinical commissioning group and enable them to ensure that the accounts comply with the requirements of the Accounts Direction) and for safeguarding the clinical commissioning group's assets (and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities), are set out in the Clinical Commissioning Group accountable officer Appointment Letter.

Under the National Health Service Act 2006 (as amended), NHS England has directed each clinical commissioning group to prepare for each financial year financial statements in the form and on the basis set out in the Accounts Direction. The financial statements are prepared on an accruals basis and must give a true and fair view of the state of affairs of the clinical commissioning group and of its net expenditure, changes in taxpayers' equity and cash flows for the financial year.

In preparing the financial statements, the accountable officer is required to comply with the requirements of the Manual for Accounts issued by the Department of Health and in particular to:

Observe the Accounts Direction issued by NHS England, including the relevant accounting and disclosure requirements, and apply suitable accounting policies on a consistent basis;

Make judgements and estimates on a reasonable basis;

State whether applicable accounting standards as set out in the Manual for Accounts issued by the Department of Health have been followed, and disclose and explain any material departures in the financial statements; and,

Prepare the financial statements on a going concern basis.

To the best of my knowledge and belief, I have properly discharged the responsibilities set out in my Clinical Commissioning Group accountable officer appointment letter.

Fiona Clark

Chief Officer (Accountable Officer)

NHS Southport and Formby CCG

May 2015

Governance Statement

Introduction and context

The clinical commissioning group was licenced from 1 April 2013 under provisions enacted in the Health and Social Care Act 2012, which amended the National Health Service Act 2006.

The clinical commissioning group operated in shadow form prior to 1 April 2013, to allow for the completion of the licencing process and the establishment of function, systems and processes prior to the clinical commission group taking on its full powers.

As at 1 April 2014, the clinical commissioning group was licensed **without** conditions, and remains so at the date of this report.

The clinical commissioning group is a clinically led membership organisation made up of general practices

The functions that the group is responsible for exercising are set out in the Health and Social Care Act 2012.

1. commissioning certain health services (where NHS England is not under a duty to do so) that meet the reasonable needs of:
 - a) all people registered with member GP practices, and
 - b) people who are usually resident within the area and are not registered with a member of any clinical commissioning group
2. commissioning emergency care for anyone present in the group's area;
3. paying its employees' remuneration, fees and allowances in accordance with the determinations made by its Governing Body and determining any other terms and conditions of service of the group's employees
4. determining the remuneration and travelling or other allowances of members of its Governing Body

Scope of responsibility

As accountable officer, I have responsibility for maintaining a sound system of internal control that supports the achievement of the clinical commissioning group's policies, aims and objectives, whilst safeguarding the public funds and assets for which I am personally responsible, in accordance with the responsibilities assigned to me in *Managing Public Money*. I also acknowledge my responsibilities as set out in my Clinical Commissioning Group accountable officer Appointment Letter.

I am responsible for ensuring that the clinical commissioning group is administered prudently and economically and that resources are applied efficiently and effectively, safeguarding financial propriety and regularity.

Compliance with the UK Corporate Governance Code

Whilst the detailed provisions of the UK Corporate Governance Code are not mandatory for public sector bodies, compliance is considered to be good practice. This Governance Statement is intended to demonstrate the clinical commissioning group's continued aspirations to comply with the principles set out in code.

For the financial year ended 31 March 2015, and up to the date of signing this statement, we continued to work towards full compliance with the provisions set out in the code, and to apply the principles of the code.

The clinical commissioning group governance framework

The National Health Service Act 2006 (as amended), at paragraph 14L(2)(b) states:

The main function of the governing body is to ensure that the group has made appropriate arrangements for ensuring that it complies with such generally accepted principles of good governance as are relevant to it.

The CCG comprises membership from the practices in the following table.

Practice Name and Address
Churchtown Medical Centre - Cambridge Road, PR9 7LT
Marshside Surgery - 117 Flyde Road, Southport, PR9 9XL
Corner Surgery - 117 Fylde Road, Southport, PR9 9XL
Norwood - 11 Norwood Avenue, Southport, PR9 7EG
Roe Lane - 172 Roe Lane, Southport, PR9 7PN
Sussex Rd Surgery - 125 Sussex Rd PR8 6AF (merged with Curzon Road 30/11/14)
Curzon Rd Surgery - 5 Curzon Rd, PR8 6PN (took over Sussex Road on 30/11/14)
Trinity Practice - Houghton St, Southport
Cumberland House - 58 Scarisbrick New Road, Southport, PR8 6PG
Kew Surgery - 85 Town Lane PR8 6RG
St Marks - 42 Derby Road, Southport, PR9 0TZ
The Grange - 41 York Road, Southport, PR8 2AD
Family Surgery - 107 Liverpool Road, Southport, PR8 4DB
Lincoln - 33 Lincoln Road, Southport, PR8 4PR
Ainsdale Medical Centre - 66 Station Road, Ainsdale, Southport, PR8 3HW
Ainsdale Village - 2 Leamington Road, Ainsdale, Southport, PR8 3LB
Chapel Lane - 13 Chapel Lane, Formby, L37 4DL
The Hollies - Elbow Lane, Formby, L37 4AD
The Village Surgery - Elbow Lane, Formby, L37 4AD
Freshfield - 61 Gores Lane, Formby, L37 3NU

The clinical commissioning group is a clinically led membership organisation made up of general practices. The member practices of the CCG are responsible for determining the governing arrangements for the organisation which are set out its Constitution¹⁶.

The Constitution has been developed to reflect and support the objectives and values defined by the CCG and to ensure that all business functions discharged by the CCG are discharged in an open and transparent manner and the Constitution has been developed with the member practices and localities.

The CCG functions in respect of the geographical area defined as Southport and Formby.

The Governing Body comprises a diverse range of skills from executive and lay members and there is a clear division of responsibility between running the Governing Body and running the operational elements of the CCG's business. The chair is responsible for the leadership of the Governing Body and ensures that directors have had access to relevant information to assist them in the delivery of their duties. The lay members have actively provided scrutiny and challenge at Governing Body and sub-committee level. Each committee comprises membership and representation from appropriate officers and lay members with sufficient experience and knowledge to support the committees in discharging their duties.

The Governing Body has been well attended by all directors and lay members throughout the year ensuring that the Governing Body has been able to make fully informed decisions to support and deliver the strategic objectives. A record of attendance is provided in the table below.

The Governing Body is assured of its effectiveness in terms of performance management through the regular corporate performance reports on finance, quality and key performance indicators as set out in national guidance. Throughout the year performance has continued to be maintained or improved which represents a significant achievement.

The Governing Body was assured of its effectiveness by holding development sessions with an external provider that enabled discussion and reflection on performance, achievement of objectives, future programmes of work and on the effective leadership of Governing Body in delivering the CCG's strategy.

The Governing Body is supported by a sub-committee structure comprising the committees listed below.

Quality Committee

This committee has delegated responsibility for monitoring the quality of commissioned services, compliance with Controlled Drugs Regulations 2013 considering information from governance, risk management and internal control systems and; provides corporate focus, strategic direction and momentum for governance and risk management.

The committee reviews and scrutinises the Governing Body assurance framework (GBAF) and the corporate risk register. The committee has delegated responsibility for the approval of corporate policies and during the year has received updates and requests for approvals on the key following policies and processes

- Information governance
- Serious incidents
- Health and safety
- Adult and children safeguarding
- Risk management
- Governing Body assurance framework

The committee also reviewed and scrutinised the following:

- Early warning dashboards
- Provider quality reports
- Safeguarding arrangements
- Complaints management arrangements
- Complaints trends

The committee comprises the accountable officer, chief nurse, CCG officers, lay members, clinicians and other CCG officers to ensure that the committee is appropriately skilled and resourced to deliver its objectives.

The Quality Committee has been well attended by all CCG officers, lay members and clinicians throughout the year ensuring that there has been robust scrutiny and challenge at all times. This has enabled the Quality Committee to provide robust assurances to the Governing Body and to inform the Governing Body of key risk areas.

Dr Kati Scholtz	GP Locality Lead – North	√	√	√	L	L	A						

Key highlights: during the year the Quality Committee:

- Provided assurance to the Governing Body on the objectives and controls within the Governing Body assurance framework and corporate risk register
- Provided assurance of compliance with the information governance toolkit
- Approved safeguarding arrangements
- Approved corporate and clinical policies
- Approved complaints management arrangements
- Reviewed Continuing Health Care systems and processes
- An assessment of the Committee's effectiveness

The committee is supported by a Corporate Governance Support Group, Engagement and Patient Experience Group and Serious Incident Review Group.

The chief officer stepped down as a substantive member and became an ex-officio member in September 2014.

Audit Committee

Role of the Audit Committee

The Codes of Conduct and Accountability, issued in April 1994, set out the requirement for every NHS Board to establish an Audit Committee. That requirement remains in place today and reflects not only established best practice in the private and public sectors, but the constant principle that the existence of an independent Audit Committee is a central means by which a Governing Body ensures effective internal control arrangements are in place. In addition, the Committee provides constructive support to senior officers to achieve the strategic aims of the clinical commissioning group.

The principal functions of the committee are as follows:

- i) To support the establishment of an effective system of integrated governance, risk management and internal control, across the whole of the CCGs activities to support the delivery of the CCGs objectives, and
- ii) To review and approve the arrangements for discharging the CCGs statutory financial duties

The committee met and was attended by substantive members as follows:

Post	Name	30 April 2014	3 June 2014	9 July 2014	8 Oct 2014	7 Jan 2015
Members						
Audit Chair	Helen Nichols	✓	✓	✓	X	✓
Lay Member - Patient Experience and Engagement	Roger Pontefract	✓	✓	✓	✓	✓
Practice Manager - Governing Body Member	Paul Ashby	✓	✓	✓	✓	✓
Practice Manager - Governing Body Member	Colette Riley	✓	X	✓	✓	X
Secondary Care Doctor and Governing Body Member	Jeff Simmonds (substantive member with effect from October 2014)	X	✓	X	✓	X
Attendees						
Chief Finance Officer	Martin McDowell	✓	✓	X	✓	✓
Chief Nurse and Quality Officer	Debbie Fagan	✓	✓	X	✓	✓
Deputy Chief Finance Officer	David Smith	X	X	✓	✓	X
Chief Accountant	Ken Jones	✓	✓	X	✓	✓
Chief Officer	Fiona Clark	X	✓	X	X	X
Interim Deputy Chief Finance Officer	David Bacon	X	✓	X	X	X
Internal Audit	Adrian Poll	✓	X	✓	✓	✓
External Audit	Stuart Baron/Rachel McIlwraith/Ian Roberts/Mark Jones/Elizabeth Tay	✓	✓	✓	X	✓
Local Counter Fraud Service	Stewart Davidson/Bernard McNamara/Roger Causer/Wendy Currums	✓	X	X	✓	✓

The committee comprises three members of the clinical commissioning group Governing Body:

- Lay member (governance) (chair)
- Lay member (patient experience and engagement)
- Practice manager Governing Body Member
- Secondary Care Doctor

The Audit Committee Chair and one other member are necessary for quorum purposes.

In addition to the committee members, officers from the CCG are also asked to attend the committee. The core attendance comprises:

- Chief finance officer
- Chief nurse
- Chief accountant
- Chief corporate delivery and integration officer

In carrying out the above work, the committee has primarily utilised the work of internal audit, external audit, the work of the other sub committees of the board and other assurance functions as required. A number of representatives from external organisations attend to provide expert opinion and support:

- Audit manager MIAA
- Audit director PWC
- Local counter fraud officer MIAA

The Audit Committee supports the Governing Body by critically reviewing governance and assurance processes on which the Governing Body places reliance. The work of the Audit Committee is not to manage the process of populating the Governing Body Assurance Framework or to become involved in the operational development of risk management processes, either at an overall level or for individual risks; these are the responsibility of the Governing Body supported by line management. The role of the Audit Committee is to satisfy itself that these operational issues are being carried out appropriately by line management.

Internal audit

Role - An important principle is that internal audit is an independent and objective appraisal service within an organisation. As such, its role embraces two key areas:

- The provision of an independent opinion to the accountable officer (chief officer), the Governing Body, and to the Audit Committee on the degree to which risk management, control and governance support the achievement of the organisation's agreed objectives
- The provision of an independent and objective consultancy service specifically to help line management improve the organisation's risk management, control and governance arrangements

During 2014-15 Mersey Internal Audit Agency (MIAA) have reviewed the operations of the CCG, have found no major issues and concluded that overall it has met its requirements. They have reported back on a number of areas. In all cases action plans have been implemented and are being monitored. In all areas reviewed to date '**Significant Assurance**', has been reported i.e. although some weaknesses their impact would be minimal or unlikely.

There were no areas reported by MIAA where weaknesses in control, or consistent non-compliance with key controls, could have resulted in failure to achieve the review objective. Regular progress reports will continue to be provided to each Audit Committee meeting.

External audit

Role - The objectives of the external auditors are to review and report on the CCG's financial statements and on its statement on internal control.

This will be followed by the publication of the Annual Audit Letter to the Governing Body in its September meeting.

Counter fraud specialist

Role – To ensure the discharge of the requirements for countering fraud within the NHS, the role is based around seven generic areas, creating an antifraud culture, deterrence, prevention, detection, investigation, sanctions and redress. The local counter fraud specialist presented the Audit Committee plan for approval during 2014/15 and provided regular updates at meetings.

Regular items for review

The Audit Committee follows a work plan approved at the beginning of the financial year, which includes, as required:

- Losses and special payments
- Outstanding debts
- Financial policies and procedures
- Tender waivers
- Register of interest
- Information governance toolkit compliance report
- Minutes of the sub committees of the Governing Body
- An assessment of the Committee's effectiveness

Conclusions

The Audit Committee is a key committee of the Governing Body, with significant monitoring and assurance responsibilities requiring commitment from members and support from a number of external parties. The work plan has been developed in line with best practice described in the Audit Committee Handbook and forms the basis of meetings. In all of these areas the Audit Committee seeks to assure the CCG that effective internal controls are in place and will remain so in the future.

In summary the work of the Audit Committee, in the second full financial year in which the CCG has been in existence, can provide assurance to the Governing Body:

- an effective system of integrated governance, risk management and internal control is in place to support the delivery of the CCGs objectives and that arrangements for discharging the CCGs statutory financial duties are now established
- there were no areas reported by MIAA where weaknesses in control, or consistent non-compliance with key controls, could have resulted in failure to achieve the objective
- ISA260 Audit Highlights Memorandum will be reported by PWC to the June meeting as part of the Annual Accounts approval process. This will be followed the publication of the Annual Audit Letter to the Governing Body in its September meeting

Remuneration Committee

The committee ensures compliance with statutory requirements and undertook reviews of very senior managers' remuneration and to comply with the requirements set out in the NHS Codes of Conduct and Accountability and the Higgs report.¹⁷ The committee reviews and agrees appraisal and remuneration of CCG officers:

During the year the committee has agreed levels of remuneration for GP support specific programmes of CCG work and to consider pay for Very Senior Managers (VSM). The Remuneration Committee met in full quorum for all meetings during the year.

Finance and Resources Sub Committee

The committee oversees and monitors financial and workforce development strategies; monitors the annual revenue budget and planned savings; develops and delivers capital investment; is responsible for reviewing financial and workforce risk registers; and financial, workforce and contracting performance.

Service Improvement and Re-design Committee

This committee has been established as a sub-committee of the Governing Body to enable thorough and open discussion about all service improvement and re-design priorities of the CCG. It provides a forum for the CCG localities, their practices clinical leads, CCG locality leads and practice representatives to identify potential areas of improvement and support plans and proposals for implementation.

¹⁷ D, Higgs (January 2003) *Review of the Role and Effectiveness of non-executive directors* section 13.8 at page 61 – available at <http://www.berr.gov.uk/files/file23012.pdf>

The clinical commissioning group risk management framework

The system of internal control is designed to manage risk to a reasonable level rather than to eliminate all risk of failure to achieve policies, aims and objectives; it can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is based on an on-going process designed to:

- identify and prioritise the risks to the achievement of the organisation's policies, aims and objectives
- evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them efficiently, effectively and economically

The Governing Body has developed the corporate objectives, and the evaluation of the risks to achieving these objectives are set out in the Governing Body Assurance Framework which is regularly reviewed and scrutinised by the senior management team, Corporate Governance Support Group, Quality Committee, Audit Committee and the Governing Body.

The Governing Body Assurance Framework is a key document whose purpose is to provide the Governing Body with 'reasonable' assurance that internal systems are functioning effectively. It is a high level document that is used to inform and give assurance to the Governing Body that the risks to achieving key objectives are recognised and that controls are in place or being developed to manage these risks.

Risks are rated, and controls that will address these risks are identified, gaps in control or assurance are noted and action plans to close gaps summarised and updated. Potential and actual sources of assurance are identified and the latter are also rated for the level of assurance provided. A summary of the assurance levels for all assurance framework entries is updated each quarter and accompanies the full document.

The corporate risk register provides the Governing Body with a summary of the principal risks facing the organisation, with a summary of the actions needed and being taken to reduce these risks to an acceptable level. The information contained in the corporate risk register should be sufficient to allow the Governing Body to be involved in prioritising and managing major risks. The risks described in the corporate risk register will be more wide-ranging than those in the Governing Body assurance framework, covering a number of domains.

Where risks to achieving organisational objectives are identified in the corporate risk register these are added to the Governing Body assurance framework; and where gaps in control are identified in the Governing Body assurance framework, these risks are added to the corporate risk register. The two documents thus work together to provide the Governing Body with assurance and action plans on risk management in the organisation.

The corporate risk register is updated and presented for review and scrutiny at the same time as the Governing Body assurance framework.

The CCG commissions a range of training programmes which include specific mandatory training for particular staff groups which aims to minimise the risks inherent in their daily work. Information governance, counter fraud, fire, health and safety, equality and diversity and safeguarding training are mandatory training requirements for all staff.

Targeted training is provided to designated risk leads to support development of risk registers, and one to one sessions are available for all managers responsible for updating the Governing Body assurance framework.

The clinical commissioning group internal control framework

A system of internal control is the set of processes and procedures in place in the clinical commissioning group to ensure it delivers its policies, aims and objectives. It is designed to identify and prioritise the risks, to evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them, efficiently, effectively and economically.

The system of internal control allows risk to be managed to a reasonable level rather than eliminating all risk; it can therefore only provide reasonable and not absolute assurance of effectiveness.

Information governance

All key information assets have been identified by the information asset owners on an information asset register. The data security and confidentiality risks to each asset have been identified, and controls identified to mitigate risks.

The risks to the physical information assets are minimal, and pose no significant information governance concern for the CCG.

All inbound and outbound flows of data have been identified through a data flow mapping tool. All data flows are being transferred appropriately.

The risks to the inbound and outbound flows of data are minimal, and pose no significant information governance concern for the CCG.

The Head of Audit's opinion on the Assurance Framework determined that: *An Assurance Framework has been established which is designed and operating to meet the requirements of the Annual Governance Statement and provide reasonable assurance that there is an effective system of internal control to manage the principal risks identified by the organisation.*

The NHS Information Governance Framework sets the processes and procedures by which the NHS handles information about patients and employees, in particular personal identifiable information. The NHS Information Governance Framework is supported by an Information Governance Toolkit and the annual submission process provides assurances to the clinical commissioning group, other organisations and to individuals that personal information is dealt with legally, securely, efficiently and effectively.

The CCG places high importance on ensuring there are robust information governance systems and processes in place to help protect patient and corporate information. We have established an information governance management framework and are developing information governance processes and procedures in line with the information governance toolkit. We have ensured all staff undertake annual information governance training and have implemented a staff information governance handbook to ensure staff are aware of their information governance roles and responsibilities.

There are processes in place for incident reporting and investigation of serious incidents.

Pension obligations

As an employer with staff entitled to membership of the NHS Pension Scheme, control measures are in place to ensure all employer obligations contained within the scheme regulations are complied with. This includes ensuring that deductions from salary, employer's contributions and payments into the scheme are in accordance with the scheme rules, and that member pension scheme records are accurately updated in accordance with the timescales detailed in the regulations.

Equality, Diversity and Human Rights obligations

Control measures are in place to ensure that the clinical commissioning group complies with the required public sector equality duty set out in the Equality Act 2010.

Sustainable development obligations

The CCG is developing plans to assess risks, enhance performance and reduce its impact, including against carbon reduction and climate change adaptation objectives. This includes establishing mechanisms to embed social and environmental sustainability across policy development, business planning and in commissioning. As accountable officer I will ensure the clinical commissioning group complies with its obligations under the Climate Change Act 2008, including the Adaptation Reporting power, and the Public Services (Social Value) Act 2012. The CCG will also set out its commitments as a socially responsible employer.

Risk assessment in relation to governance, risk management and internal control

NHS Southport and Formby CCG has a comprehensive risk management strategy. The following key elements are contained within the strategy:

- Risk management strategy aims and objectives
- Roles, responsibilities and accountability
- The risk management process – risk identification, risk assessment, risk treatment, monitoring and review, risk prevention
- Risk grading – criteria
- Training and support

NHS Southport and Formby CCG has established a number of mechanisms for identifying and managing risks including risk profiling methodology, incident reporting, complaints and litigation data, and staff concerns or whistleblowing.

Risk management and the ensuing development of risk registers is generally achieved using a dual 'top-down' and 'bottom-up' approach to identifying and managing risks. The 'top-down' element has been addressed through the development of a Governing Body assurance framework and corporate risk register identifying strategic high-level risks. These two documents are based on models which have previously been accepted as meeting audit requirements.

Key new risks identified during 2014-15 are

- CSU sustainability of services following the unsuccessful bid by NW CSU to join the Lead Provider Framework
- Potential conflicts of interest arising as a result of joint commissioning arrangements
- Capacity across CCG and council to deliver a robust and co-ordinated one year and three year plan

Review of economy, efficiency and effectiveness of the use of resources

The CCG seeks to gain best value through all of its contracting and procurement processes. The CCG has approved a scheme of delegation, prime financial policies and a schedule of financial limits that ensures there are proper controls in respect of expenditure.

The agreed limits for quotation and tendering are detailed in those policies and staff are required to properly assess bids for services in accordance with the policies.

The CCG buys procurement expertise and support from the North West CSU and this service is delivered by appropriately trained and accredited individuals.

All newly acquired services are subject to robust assessment to ensure that patients are able to benefit from quality, value for money services.

Review of the effectiveness of governance, risk management and internal control

As accounting officer I have responsibility for reviewing the effectiveness of the system of internal control within the clinical commissioning group.

Capacity to handle risk

The chief officer has accountability for ensuring there are robust arrangements in place for the identification and management of risk. The chief officer is supported in this role by the chief corporate delivery and integration officer. Expertise and support is also procured from the North West Commissioning Support Unit (the CSU) that offers advice to all staff on the identification and management of risk.

The senior management team (SMT) has received training on the development and management of the Governing Body's assurance framework and all staff are able to access "hands on" support at all times. All SMT members have received the risk management strategy and have also had training on incident reporting procedures.

The CCG fosters a culture of openness and encourages the sharing of good practice and learning when things go wrong.

Review of effectiveness

My review of the effectiveness of the system of internal control is informed by the work of the internal auditors and the senior management team, managers and clinical leads within the clinical commissioning group who have responsibility for the development and maintenance of the internal control framework. I have drawn on performance information available to me. My review is also informed by comments made by the external auditors in their management letter and other reports.

The *Governing Body assurance framework* itself provides me with evidence that the effectiveness of controls that manage risks to the clinical commissioning group achieving its principles objectives have been reviewed.

I have been advised on the implications of the result of my review of the effectiveness of the system of internal control by the Governing Body, the Audit Committee, Quality Committee and Finance and Resources Committee, if appropriate and a plan to address weaknesses and ensure continuous improvement of the system is in place.

The Governing Body receives the minutes of all committees including the Audit Committee, Quality Committee, Finance and Resources Committee and Service Improvement and Re-design Committee. The Quality Committee approves relevant policies following review and assessment by the Corporate Governance Support Group and the Audit Committee monitors action plans arising from internal audit reviews.

Internal audit is a key component of internal control. The Audit Committee approves the annual internal audit plan, and progress against this plan is reported to each meeting of the committee. The individual reviews carried out throughout the year assist the director of audit to form his opinion, which in turn feeds the assurance process.

Following completion of the planned audit work for the financial year for the clinical commissioning group, the head of internal audit issued an independent and objective opinion on the adequacy and effectiveness of the clinical commissioning group's system of risk management, governance and internal control. The head of internal audit opinion concluded that; *An Assurance Framework has been established which is designed and operating to meet the requirements of the Annual Governance Statement and provide reasonable assurance that there is an effective system of internal control to manage the principal risks identified by the organisation.*

Data quality

The North West Commissioning Support Unit “the CSU” is commissioned to provide the CCG with *inter alia*, performance reports, contract monitoring reports, quality dashboards and other activity and performance data. The CSU’s data management information centre (DMIC) processes and quality assures the data that is received from providers and works with the CCG to challenge providers if inconsistencies are identified.

The CCG’s chief analyst also assesses the quality of the data provided and ensures that concerns are addressed through the provider Information Sub Group meetings.

These processes provide assurances that the quality of the data upon which the membership and Governing Body rely, is robust.

The DMIC is also licenced by the Health and Social Care Information Centre to lawfully process patient identifiable information.

Internal Audit provided an assessment of significant assurance on data quality and performance management of the CCG.

Business critical models

Officers of the CCG have reviewed the Macpherson report and considered the implications for the CCG. The CCG’s internal auditors have also undertaken a review of management accounting practices including estimation techniques and forecasting and reported that appropriate arrangements in place in respect of the control environment operating in this area.

Data security

We have submitted a level 2 compliance with the information governance toolkit assessment. The CCG’s internal auditors (MIAA) provided an assessment of significant assurance on the submission.

NHS Southport and Formby CCG has put in place policies, procedures, guidance and support to ensure that personal and corporate information is handled legally, securely, efficiently and effectively, in order to deliver high quality services. Performance is monitored through the completion of the annual information governance (IG) toolkit return and reports to the Corporate Governance Group and Quality Committee.

Controls include:

- Mandatory induction and refresher IG training for all staff
- Identifying the movement of personal data and assessing associated risks, and minimising where possible
- Ensuring the encryption of all confidential data stored on portable devices
- Reporting, investigation and escalation of all information governance incidents

Discharge of statutory functions

The statutory functions of the CCG and the way in which the CCGs discharges those duties are explained within the group's constitution that has been approved by NHS England.

In light of the Harris Review, the clinical commissioning group has reviewed all of the statutory duties and powers conferred on it by the National Health Service Act 2006 (as amended) and other associated legislative and regulations. As a result, I can confirm that the clinical commissioning group is clear about the legislative requirements associated with each of the statutory functions for which it is responsible, including any restrictions on delegation of those functions.

Responsibility for each duty and power has been clearly allocated to a lead director. Directorates have confirmed that their structures provide the necessary capability and capacity to undertake all of the clinical commissioning group's statutory duties.

Conclusion

During the year no significant control issues have been identified. This is confirmed by the head of audit opinion and also by the internal audit reviews that have provided the CCG with significant assurance on the arrangements in place.

Fiona Clark
Accountable Officer
May 2015

Independent auditors' report to the Members of Southport and Formby Clinical Commissioning Group

Report on the financial statements

Our opinion

In our opinion the financial statements, defined below:

- give a true and fair view, of the state of the Clinical Commissioning Group's affairs as at 31 March 2015 and of its net operating costs and cash flows for the year then ended; and
- have been properly prepared in accordance with the accounting policies directed by the NHS Commissioning Board with the approval of the Secretary of State as being relevant to the National Health Service in England.

This opinion is to be read in the context of what we say in the remainder of this report.

What we have audited

The financial statements, which are prepared by Southport and Formby Clinical Commissioning Group ("CCG"), comprise:

- the Statement of Comprehensive Net Expenditure for the year then ended;
- the Statement of Financial Position as at 31 March 2015;
- the Statement of Changes in Taxpayers' Equity for the year then ended;
- the Statement of Cash Flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in their preparation is the accounting policies directed by the NHS Commissioning Board with the approval of the Secretary of State as being relevant to the National Health Service in England.

In applying the financial reporting framework, the Accountable Officer has made a number of subjective judgements, for example in respect of significant accounting estimates. In making such estimates, they have made assumptions and considered future events.

We have also audited the information in the Remuneration Report that is subject to audit, being:

- the table of salaries and allowances of senior managers and related narrative notes on page 62;
 - the table of pension benefits of senior managers and related narrative notes on page 63; and
 - the table of pay multiples and related narrative notes on page 64.
-

What an audit of financial statements involves

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) ("ISAs (UK & Ireland)"). An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of:

- whether the accounting policies are appropriate to the CCG's circumstances and have been consistently applied and adequately disclosed;
- the reasonableness of significant accounting estimates made by the Accountable Officer; and
- the overall presentation of the financial statements.

In addition, we read all the financial and non-financial information in the Annual Report and Annual Accounts to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

We are also required to obtain evidence sufficient to give reasonable assurance that the expenditure and income reported in the financial statements have been applied to the purposes intended by Parliament and the financial transactions conform to the authorities which govern them.

Opinions on other matters prescribed by the Code of Audit Practice

In our opinion:

- the information given in the Annual Report for the financial year for which the financial statements are prepared is consistent with the financial statements;
- the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the requirements directed by the NHS Commissioning Board with the approval of the Secretary of State.
- in all material respects the expenditure and income reflected in the financial statements have been applied to the purposes intended by Parliament and the financial transactions conform to the authorities which govern them.

Other matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Code of Audit Practice issued by the Audit Commission requires us to report to you if:

- in our opinion, the Governance Statement does not comply with the Annual Accounts guidance 2014/15, issued on 24 February 2015 by the NHS Commissioning Board or is misleading or inconsistent with information of which we are aware from our audit;
- we refer a matter to the Secretary of State under section 19 of the Audit Commission Act 1998 because the CCG, or an officer of the CCG, is about to make, or has made, a decision involving unlawful expenditure, or is about to take, or has taken, unlawful action likely to cause a loss or deficiency; or
- we issue a report in the public interest under section 8 of the Audit Commission Act 1998.

Responsibilities for the financial statements and the audit

Our responsibilities and those of the Accountable Officer

As explained more fully in the Statement of Accountable Officer's Responsibilities set out on page 69 the Accountable Officer is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view in accordance with the accounting policies directed by the NHS Commissioning Board with the approval of the Secretary of State.

Our responsibility is to audit and express an opinion on the financial statements in accordance with Part II of the Audit Commission Act 1998, the Code of Audit Practice 2010 for local NHS bodies issued by the Audit Commission and ISAs (UK & Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the Governing Body of Southport and Formby CCG in accordance with Part II of the Audit Commission Act 1998 as set out in paragraph 44 of the Statement of Responsibilities of Auditors and of Audited Bodies (Local NHS bodies) published by the Audit Commission in April 2014, and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Conclusion on the CCG's arrangements for securing economy, efficiency and effectiveness in its use of resources

Conclusion

On the basis of our work, having regard to the guidance issued by the Audit Commission on 13 October 2014, we have no matters to report with respect to whether Southport and Formby CCG put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources for the year ending 31 March 2015.

What a review of the arrangements for securing economy, efficiency and effectiveness in the use of resources involves

We have undertaken our audit in accordance with the Code of Audit Practice, having regard to the guidance issued by the Audit Commission on 13 October 2014, as to whether the CCG has proper arrangements for:

- securing financial resilience; and
- challenging how it secures economy, efficiency and effectiveness.

The Audit Commission has determined these two criteria as those necessary for us to consider under the Code of Audit Practice in satisfying ourselves whether the CCG has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2015.

We planned our work in accordance with the Code of Audit Practice. Based on our risk assessment, we undertook such work as we considered necessary to form a view on whether, in all significant respects, the Trust had put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources.

Our responsibilities and those of the CCG

The CCG is responsible for putting in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources, to ensure proper stewardship and governance, and to review regularly the adequacy and effectiveness of these arrangements.

We are required under Section 5 of the Audit Commission Act 1998 to satisfy ourselves that the CCG has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the Audit Commission requires us to report to you any matters that prevent us being satisfied that the CCG has put in place such arrangements, having regard to the criteria specified by the Audit Commission on 13 October 2014.

We report if significant matters have come to our attention which prevent us from concluding that the CCG has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources. We are not required to consider, nor have we considered, whether all aspects of the CCG's arrangements for securing economy, efficiency and effectiveness in its use of resources are operating effectively.

Certificate

We certify that we have completed the audit of the financial statements of Southport and Formby CCG in accordance with the requirements of Part II of the Audit Commission Act 1998 and the Code of Audit Practice issued by the Audit Commission.

Notes to the financial statements

1 Accounting Policies

NHS England has directed that the financial statements of clinical commissioning groups shall meet the accounting requirements of the *Manual for Accounts* issued by the Department of Health. Consequently, the following financial statements have been prepared in accordance with the *Manual for Accounts 2014-15* issued by the Department of Health. The accounting policies contained in the *Manual for Accounts* follow International Financial Reporting Standards to the extent that they are meaningful and appropriate to clinical commissioning groups, as determined by HM Treasury, which is advised by the Financial Reporting Advisory Board. Where the *Manual for Accounts* permits a choice of accounting policy, the accounting policy which is judged to be most appropriate to the particular circumstances of the clinical commissioning group for the purpose of giving a true and fair view has been selected. The particular policies adopted by the clinical commissioning group are described below. They have been applied consistently in dealing with items considered material in relation to the accounts.

1.1 Going Concern

These accounts have been prepared on the going concern basis. Public sector bodies are assumed to be going concerns where the continuation of the provision of a service in the future is anticipated, as evidenced by inclusion of financial provision for that service in published documents. Where a clinical commissioning group ceases to exist, it considers whether or not its services will continue to be provided (using the same assets, by another public sector entity) in determining whether to use the concept of going concern for the final set of Financial Statements. If services will continue to be provided the financial statements are prepared on the going concern basis.

1.2 Accounting Convention

These accounts have been prepared under the historical cost convention modified to account for the revaluation of property, plant and equipment, intangible assets, inventories and certain financial assets and financial liabilities.

1.3 Acquisitions & Discontinued Operations

Activities are considered to be 'acquired' only if they are taken on from outside the public sector. Activities are considered to be 'discontinued' only if they cease entirely. They are not considered to be 'discontinued' if they transfer from one public sector body to another.

1.4 Movement of Assets within the Department of Health Group

Transfers as part of reorganisation fall to be accounted for by use of absorption accounting in line with the Government Financial Reporting Manual, issued by HM Treasury. The Government Financial Reporting Manual does not require retrospective adoption, so prior year transactions (which have been accounted for under merger accounting) have not been restated. Absorption accounting requires that entities account for their transactions in the period in which they took place, with no restatement of performance required when functions transfer within the public sector. Where assets and liabilities transfer, the gain or loss resulting is recognised in the Statement of Comprehensive Net Expenditure, and is disclosed separately from operating costs.

Other transfers of assets and liabilities within the Department of Health Group are accounted for in line with IAS 20 and similarly give rise to income and expenditure entries.

1.5 Charitable Funds

From 2014-15, the divergence from the Government Financial Reporting Manual that NHS Charitable Funds are not consolidated with bodies' own returns is removed. Under the provisions of IAS 27: Consolidated & Separate Financial Statements, those Charitable Funds that fall under common control with NHS bodies are consolidated within the entities' accounts.

1.6 Pooled Budgets

Where the clinical commissioning group has entered into a pooled budget arrangement under Section 75 of the National Health Service Act 2006 the clinical commissioning group accounts for its share of the assets, liabilities, income and expenditure arising from the activities of the pooled budget, identified in accordance with the pooled budget agreement.

If the clinical commissioning group is in a "jointly controlled operation", the clinical commissioning group recognises:

- The assets the clinical commissioning group controls;
- The liabilities the clinical commissioning group incurs;
- The expenses the clinical commissioning group incurs; and,
- The clinical commissioning group's share of the income from the pooled budget activities.

If the clinical commissioning group is involved in a "jointly controlled assets" arrangement, in addition to the above, the clinical commissioning group recognises:

- The clinical commissioning group's share of the jointly controlled assets (classified according to the nature of the assets);
- The clinical commissioning group's share of any liabilities incurred jointly; and,
- The clinical commissioning group's share of the expenses jointly incurred.

1.7 Critical Accounting Judgements & Key Sources of Estimation Uncertainty

In the application of the clinical commissioning group's accounting policies, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from those estimates and the estimates and underlying assumptions are continually reviewed. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Notes to the financial statements

1.8 Revenue

Revenue in respect of services provided is recognised when, and to the extent that, performance occurs, and is measured at the fair value of the consideration receivable.

Where income is received for a specific activity that is to be delivered in the following year, that income is deferred.

1.9 Employee Benefits

1.9.1 Short-term Employee Benefits

Salaries, wages and employment-related payments are recognised in the period in which the service is received from employees, including bonuses earned but not yet taken.

The cost of leave earned but not taken by employees at the end of the period is recognised in the financial statements to the extent that employees are permitted to carry forward leave into the following period.

1.9.2 Retirement Benefit Costs

Past and present employees are covered by the provisions of the NHS Pensions Scheme. The scheme is an unfunded, defined benefit scheme that covers NHS employers, General Practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme: the cost to the clinical commissioning group of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period.

For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to expenditure at the time the clinical commissioning group commits itself to the retirement, regardless of the method of payment.

Some employees are members of the Local Government Superannuation Scheme, which is a defined benefit pension scheme. The scheme assets and liabilities attributable to those employees can be identified and are recognised in the clinical commissioning group's accounts. The assets are measured at fair value and the liabilities at the present value of the future obligations. The increase in the liability arising from pensionable service earned during the year is recognised within operating expenses. The expected gain during the year from scheme assets is recognised within finance income. The interest cost during the year arising from the unwinding of the discount on the scheme liabilities is recognised within finance costs. Actuarial gains and losses during the year are recognised in the General Reserve and reported as an item of other comprehensive net expenditure.

1.10 Other Expenses

Other operating expenses are recognised when, and to the extent that, the goods or services have been received. They are measured at the fair value of the consideration payable.

Expenses and liabilities in respect of grants are recognised when the clinical commissioning group has a present legal or constructive obligation, which occurs when all of the conditions attached to the payment have been met.

1.11 Property, Plant & Equipment

1.11.1 Recognition

Property, plant and equipment is capitalised if:

- It is held for use in delivering services or for administrative purposes;
- It is probable that future economic benefits will flow to, or service potential will be supplied to the clinical commissioning group;
- It is expected to be used for more than one financial year;
- The cost of the item can be measured reliably; and,
- The item has a cost of at least £5,000; or,
- Collectively, a number of items have a cost of at least £5,000 and individually have a cost of more than £250, where the assets are functionally interdependent, they had broadly simultaneous purchase dates, are anticipated to have simultaneous disposal dates and are under single managerial control; or,
- Items form part of the initial equipping and setting-up cost of a new building, ward or unit, irrespective of their individual or collective cost.

Where a large asset, for example a building, includes a number of components with significantly different asset lives, the components are treated as separate assets and depreciated over their own useful economic lives.

1.11.2 Valuation

All property, plant and equipment are measured initially at cost, representing the cost directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management. All assets are measured subsequently at fair value.

Land and buildings used for the clinical commissioning group's services or for administrative purposes are stated in the statement of financial position at their re-valued amounts, being the fair value at the date of revaluation less any impairment.

Revaluations are performed with sufficient regularity to ensure that carrying amounts are not materially different from those that would be determined at the end of the reporting period. Fair values are determined as follows:

- Land and non-specialised buildings – market value for existing use; and,
- Specialised buildings – depreciated replacement cost.

HM Treasury has adopted a standard approach to depreciated replacement cost valuations based on modern equivalent assets and, where it would meet the location requirements of the service being provided, an alternative site can be valued.

Properties in the course of construction for service or administration purposes are carried at cost, less any impairment loss. Cost includes professional fees but not borrowing costs, which are recognised as expenses immediately, as allowed by IAS 23 for assets held at fair value. Assets are re-valued and depreciation commences when they are brought into use.

Fixtures and equipment are carried at depreciated historic cost as this is not considered to be materially different from fair value.

An increase arising on revaluation is taken to the revaluation reserve except when it reverses an impairment for the same asset previously recognised in expenditure, in which case it is credited to expenditure to the extent of the decrease previously charged there. A revaluation decrease that does not result from a loss of economic value or service potential is recognised as an impairment charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure. Impairment losses that arise from a clear consumption of economic benefit are taken to expenditure. Gains and losses recognised in the revaluation reserve are reported as other comprehensive income in the Statement of Comprehensive Net Expenditure.

1.11.3 Subsequent Expenditure

Where subsequent expenditure enhances an asset beyond its original specification, the directly attributable cost is capitalised. Where subsequent expenditure restores the asset to its original specification, the expenditure is capitalised and any existing carrying value of the item replaced is written-out and charged to operating expenses.

Notes to the financial statements

1.12 Depreciation, Amortisation & Impairments

Freehold land, properties under construction, and assets held for sale are not depreciated.

Otherwise, depreciation and amortisation are charged to write off the costs or valuation of property, plant and equipment and intangible non-current assets, less any residual value, over their estimated useful lives, in a manner that reflects the consumption of economic benefits or service potential of the assets. The estimated useful life of an asset is the period over which the clinical commissioning group expects to obtain economic benefits or service potential from the asset. This is specific to the clinical commissioning group and may be shorter than the physical life of the asset itself. Estimated useful lives and residual values are reviewed each year end, with the effect of any changes recognised on a prospective basis. Assets held under finance leases are depreciated over their estimated useful lives.

At each reporting period end, the clinical commissioning group checks whether there is any indication that any of its tangible or intangible non-current assets have suffered an impairment loss. If there is indication of an impairment loss, the recoverable amount of the asset is estimated to determine whether there has been a loss and, if so, its amount. Intangible assets not yet available for use are tested for impairment annually. A revaluation decrease that does not result from a loss of economic value or service potential is recognised as an impairment charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure. Impairment losses that arise from a clear consumption of economic benefit are taken to expenditure. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of the recoverable amount but capped at the amount that would have been determined had there been no initial impairment loss. The reversal of the impairment loss is credited to expenditure to the extent of the decrease previously charged there and thereafter to the revaluation reserve.

1.13 Donated Assets

Donated non-current assets are capitalised at their fair value on receipt, with a matching credit to Income. They are valued, depreciated and impaired as described above for purchased assets. Gains and losses on revaluations, impairments and sales are as described above for purchased assets. Deferred income is recognised only where conditions attached to the donation preclude immediate recognition of the gain.

1.14 Government Grants

The value of assets received by means of a government grant are credited directly to income. Deferred income is recognised only where conditions attached to the grant preclude immediate recognition of the gain.

1.15 Non-current Assets Held For Sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met when:

- The sale is highly probable;
- The asset is available for immediate sale in its present condition; and,
- Management is committed to the sale, which is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell. Fair value is open market value including alternative uses.

The profit or loss arising on disposal of an asset is the difference between the sale proceeds and the carrying amount and is recognised in the Statement of Comprehensive Net Expenditure. On disposal, the balance for the asset on the revaluation reserve is transferred to the general reserve.

Property, plant and equipment that is to be scrapped or demolished does not qualify for recognition as held for sale. Instead, it is retained as an operational asset and its economic life is adjusted. The asset is de-recognised when it is scrapped or demolished.

1.16 Leases

Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases.

Notes to the financial statements

1.16.1 The Clinical Commissioning Group as Lessee

Property, plant and equipment held under finance leases are initially recognised, at the inception of the lease, at fair value or, if lower, at the present value of the minimum lease payments, with a matching liability for the lease obligation to the lessor. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate on interest on the remaining balance of the liability. Finance charges are recognised in calculating the clinical commissioning group's surplus/deficit. Operating lease payments are recognised as an expense on a straight-line basis over the lease term. Lease incentives are recognised initially as a liability and subsequently as a reduction of rentals on a straight-line basis over the lease term. Contingent rentals are recognised as an expense in the period in which they are incurred. Where a lease is for land and buildings, the land and building components are separated and individually assessed as to whether they are operating or finance leases.

1.16.2 The Clinical Commissioning Group as Lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the clinical commissioning group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the clinical commissioning group's net investment outstanding in respect of the leases. Rental income from operating leases is recognised on a straight-line basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

1.17 Private Finance Initiative Transactions

HM Treasury has determined that government bodies shall account for infrastructure Private Finance Initiative (PFI) schemes where the government body controls the use of the infrastructure and the residual interest in the infrastructure at the end of the arrangement as service concession arrangements, following the principles of the requirements of IFRIC 12. The clinical commissioning group therefore recognises the PFI asset as an item of property, plant and equipment together with a liability to pay for it. The services received under the contract are recorded as operating expenses.

The annual unitary payment is separated into the following component parts, using appropriate estimation techniques where necessary:

- Payment for the fair value of services received;
- Payment for the PFI asset, including finance costs; and,
- Payment for the replacement of components of the asset during the contract 'lifecycle replacement'.

1.18 Inventories

Inventories are valued at the lower of cost and net realisable value using the first-in first-out cost formula. This is considered to be a reasonable approximation to fair value due to the high turnover of stocks.

1.19 Cash & Cash Equivalents

Cash is cash in hand and deposits with any financial institution repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in 3 months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Statement of Cash Flows, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and that form an integral part of the clinical commissioning group's cash management.

1.20 Provisions

Provisions are recognised when the clinical commissioning group has a present legal or constructive obligation as a result of a past event, it is probable that the clinical commissioning group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the expenditure required to settle the obligation at the end of the reporting period, taking into account the risks and uncertainties.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the amount of the receivable can be measured reliably.

A restructuring provision is recognised when the clinical commissioning group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with on-going activities of the entity.

1.21 Clinical Negligence Costs

The NHS Litigation Authority operates a risk pooling scheme under which the clinical commissioning group pays an annual contribution to the NHS Litigation Authority which in return settles all clinical negligence claims. The contribution is charged to expenditure. Although the NHS Litigation Authority is administratively responsible for all clinical negligence cases the legal liability remains with the clinical commissioning group.

1.22 Non-clinical Risk Pooling

The clinical commissioning group participates in the Property Expenses Scheme and the Liabilities to Third Parties Scheme. Both are risk pooling schemes under which the clinical commissioning group pays an annual contribution to the NHS Litigation Authority and, in return, receives assistance with the costs of claims arising. The annual membership contributions, and any excesses payable in respect of particular claims are charged to operating expenses as and when they become due.

1.23 Continuing healthcare risk pooling

In 2014-15 a risk pool scheme has been introduced by NHS England for continuing healthcare claims, for claim periods prior to 31 March 2013. Under the scheme clinical commissioning group contribute annually to a pooled fund, which is used to settle the claims.

1.24 Contingencies

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the clinical commissioning group, or a present obligation that is not recognised because it is not probable that a payment will be required to settle the obligation or the amount of the obligation cannot be measured sufficiently reliably. A contingent liability is disclosed unless the possibility of a payment is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the clinical commissioning group. A contingent asset is disclosed where an inflow of economic benefits is probable.

Where the time value of money is material, contingencies are disclosed at their present value.

Notes to the financial statements

1.25 Financial Assets

Financial assets are recognised when the clinical commissioning group becomes party to the financial instrument contract or, in the case of trade receivables, when the goods or services have been delivered. Financial assets are derecognised when the contractual rights have expired or the asset has been transferred.

Financial assets are classified into the following categories:

- Financial assets at fair value through profit and loss;
- Held to maturity investments;
- Available for sale financial assets; and,
- Loans and receivables.

The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

1.26.1 Financial Assets at Fair Value Through Profit and Loss

Embedded derivatives that have different risks and characteristics to their host contracts, and contracts with embedded derivatives whose separate value cannot be ascertained, are treated as financial assets at fair value through profit and loss. They are held at fair value, with any resultant gain or loss recognised in calculating the clinical commissioning group's surplus or deficit for the year. The net gain or loss incorporates any interest earned on the financial asset.

1.26.2 Held to Maturity Assets

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity, and there is a positive intention and ability to hold to maturity. After initial recognition, they are held at amortised cost using the effective interest method, less any impairment. Interest is recognised using the effective interest method.

1.26.3 Available For Sale Financial Assets

Available for sale financial assets are non-derivative financial assets that are designated as available for sale or that do not fall within any of the other three financial asset classifications. They are measured at fair value with changes in value taken to the revaluation reserve, with the exception of impairment losses. Accumulated gains or losses are recycled to surplus/deficit on de-recognition.

1.26.4 Loans & Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments which are not quoted in an active market. After initial recognition, they are measured at amortised cost using the effective interest method, less any impairment. Interest is recognised using the effective interest method.

Fair value is determined by reference to quoted market prices where possible, otherwise by valuation techniques.

The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, to the initial fair value of the financial asset.

At the end of the reporting period, the clinical commissioning group assesses whether any financial assets, other than those held at 'fair value through profit and loss' are impaired. Financial assets are impaired and impairment losses recognised if there is objective evidence of impairment as a result of one or more events which occurred after the initial recognition of the asset and which has an impact on the estimated future cash flows of the asset.

For financial assets carried at amortised cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate. The loss is recognised in expenditure and the carrying amount of the asset is reduced through a provision for impairment of receivables.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through expenditure to the extent that the carrying amount of the receivable at the date of the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

1.27 Financial Liabilities

Financial liabilities are recognised on the statement of financial position when the clinical commissioning group becomes party to the contractual provisions of the financial instrument or, in the case of trade payables, when the goods or services have been received. Financial liabilities are derecognised when the liability has been discharged, that is, the liability has been paid or has expired.

Loans from the Department of Health are recognised at historical cost. Otherwise, financial liabilities are initially recognised at fair value.

1.27.1 Financial Guarantee Contract Liabilities

Financial guarantee contract liabilities are subsequently measured at the higher of:

- The premium received (or imputed) for entering into the guarantee less cumulative amortisation; and,
- The amount of the obligation under the contract, as determined in accordance with IAS 37: Provisions, Contingent Liabilities and Contingent Assets.

1.27.2 Financial Liabilities at Fair Value Through Profit and Loss

Embedded derivatives that have different risks and characteristics to their host contracts, and contracts with embedded derivatives whose separate value cannot be ascertained, are treated as financial liabilities at fair value through profit and loss. They are held at fair value, with any resultant gain or loss recognised in the clinical commissioning group's surplus/deficit. The net gain or loss incorporates any interest payable on the financial liability.

1.27.3 Other Financial Liabilities

After initial recognition, all other financial liabilities are measured at amortised cost using the effective interest method, except for loans from Department of Health, which are carried at historic cost. The effective interest rate is the rate that exactly discounts estimated future cash payments through the life of the asset, to the net carrying amount of the financial liability. Interest is recognised using the effective interest method.

1.28 Value Added Tax

Most of the activities of the clinical commissioning group are outside the scope of VAT and, in general, output tax does not apply and input tax on purchases is not recoverable. Irrecoverable VAT is charged to the relevant expenditure category or included in the capitalised purchase cost of fixed assets. Where output tax is charged or input VAT is recoverable, the amounts are stated net of VAT.

Notes to the financial statements

1.29 **Foreign Currencies**

The clinical commissioning group's functional currency and presentational currency is sterling. Transactions denominated in a foreign currency are translated into sterling at the exchange rate ruling on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the spot exchange rate on 31 March. Resulting exchange gains and losses for either of these are recognised in the clinical commissioning group's surplus/deficit in the period in which they arise.

1.30 **Third Party Assets**

Assets belonging to third parties (such as money held on behalf of patients) are not recognised in the accounts since the clinical commissioning group has no beneficial interest in them.

1.31 **Losses & Special Payments**

Losses and special payments are items that Parliament would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally should not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way that individual cases are handled. Losses and special payments are charged to the relevant functional headings in expenditure on an accruals basis, including losses which would have been made good through insurance cover had the clinical commissioning group not been bearing its own risks (with insurance premiums then being included as normal revenue expenditure).

1.32 **Research & Development**

Research and development expenditure is charged in the year in which it is incurred, except insofar as development expenditure relates to a clearly defined project and the benefits of it can reasonably be regarded as assured. Expenditure so deferred is limited to the value of future benefits expected and is amortised through the Statement of Comprehensive Net Expenditure on a systematic basis over the period expected to benefit from the project. It should be re-valued on the basis of current cost. The amortisation is calculated on the same basis as depreciation.

1.33 **Accounting Standards That Have Been Issued But Have Not Yet Been Adopted**

The Government Financial Reporting Manual does not require the following Standards and Interpretations to be applied in 2014-15, all of which are subject to consultation:

- IFRS 9: Financial Instruments
- IFRS 13: Fair Value Measurement
- IFRS 14: Regulatory Deferral Accounts
- IFRS 15: Revenue for Contract with Customers

The application of the Standards as revised would not have a material impact on the accounts for 2014-15, were they applied in that year.

4.5 Pension costs

Past and present employees are covered by the provisions of the NHS Pension Scheme. Details of the benefits payable under these provisions can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/Pensions.

The Scheme is an unfunded, defined benefit scheme that covers NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The Scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities.

Therefore, the Scheme is accounted for as if it were a defined contribution scheme: the cost to the clinical commissioning group of participating in the Scheme is taken as equal to the contributions payable to the Scheme for

The Scheme is subject to a full actuarial valuation every four years (until 2004, every five years) and an accounting valuation every year. An outline of these follows:

4.5.1 Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability in respect of the benefits due under the Scheme (taking into account its recent demographic experience), and to recommend the contribution rates to be paid by employers and scheme members. The last such valuation, which determined current contribution rates was undertaken as at 31 March 2004 and covered the period from 1 April 1999 to that date. The conclusion from the 2004 valuation was that the Scheme had accumulated a notional deficit of £3.3 billion against the notional assets as at 31 March 2004.

In order to defray the costs of benefits, employers pay contributions at 14% of Pensionable pay and most employees had up to April 2008 paid 6%, with manual staff paying 5%.

Following the full actuarial review by the Government Actuary undertaken as at 31 March 2004, and after consideration of changes to the NHS Pension Scheme taking effect from 1 April 2008, his Valuation report recommended that employer contributions could continue at the existing rate of 14% of Pensionable pay, from 1 April 2008, following the introduction of employee contributions on a tiered scale from 5% up to 8.5% of their Pensionable pay depending on total earnings. On advice from the scheme actuary, scheme contributions may be varied from time

4.5.2 Accounting valuation

A valuation of the scheme liability is carried out annually by the scheme actuary as at the end of the reporting period by updating the results of the full actuarial valuation.

Between the full actuarial valuations at a two-year midpoint, a full and detailed member data-set is provided to the scheme actuary. At this point the assumptions regarding the composition of the scheme membership are updated to allow the scheme liability to be valued.

The valuation of the scheme liability as at 31 March 2011 is based on detailed membership data as at 31 March 2008 (the latest midpoint) updated to 31 March 2011 with summary global member and accounting data.

The latest assessment of the liabilities of the Scheme is contained in the scheme actuary report, which forms part of the annual NHS Pension Scheme (England and Wales) Resource Account, published annually. These accounts can be viewed on the NHS Pensions website. Copies can also be obtained from The Stationery Office.

4.5 Pension costs

4.5.3 Scheme Provisions

The NHS Pension Scheme provides defined benefits, which are summarised below. This list is an illustrative guide only, and is not intended to detail all the benefits provided by the Scheme or the specific conditions that must be met before these benefits can be obtained:

- The Scheme is a “final salary” scheme. Annual pensions are normally based on 1/80th for the 1995 section and of the best of the last three years pensionable pay for each year of service, and 1/60th for the 2008 section of reckonable pay per year of membership. Members who are practitioners as defined by the Scheme Regulations have their annual pensions based upon total pensionable earnings over the relevant pensionable service;
- With effect from 1 April 2008 members can choose to give up some of their annual pension for an additional tax free lump sum, up to a maximum amount permitted under HM Revenue & Customs rules. This new provision is known as “pension commutation”;
- Annual increases are applied to pension payments at rates defined by the Pensions (Increase) Act 1971, and are based on changes in retail prices in the twelve months ending 30 September in the previous calendar year;
- Early payment of a pension, with enhancement, is available to members of the Scheme who are permanently incapable of fulfilling their duties effectively through illness or infirmity. A death gratuity of twice final year’s pensionable pay for death in service, and five times their annual pension for death after retirement is payable;
- For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to the statement of comprehensive net expenditure at the time the clinical commissioning group commits itself to the retirement, regardless of the method of payment; and,
- Members can purchase additional service in the Scheme and contribute to money purchase AVC’s run by the Scheme’s approved providers or by other Free Standing Additional Voluntary Contributions (FSAVC) providers.

The "Other" provisions held relate to Administration charges in respect of CHC Restitution cases, and Commissioning Support transformation costs.

31 Contingencies

Contingent liabilities

The Clinical Commissioning Group does not have any contingent liabilities.

Contingent assets

The Clinical Commissioning Group does not have any contingent assets.

32 Commitments

32.1 Capital commitments

The Clinical Commissioning Group does not have any capital commitments.

32.2 Other financial commitments

The Clinical Commissioning Group does not have any other financial commitments.

33 Financial instruments

33.1 Financial risk management

Financial reporting standard IFRS 7 requires disclosure of the role that financial instruments have had during the period in creating or changing the risks a body faces in undertaking its activities.

Because NHS Clinical Commissioning Group is financed through parliamentary funding, it is not exposed to the degree of financial risk faced by business entities. Also, financial instruments play a much more limited role in creating or changing risk than would be typical of listed companies, to which the financial reporting standards mainly apply. The clinical commissioning group has limited powers to borrow or invest surplus funds and financial assets and liabilities are generated by day-to-day operational activities rather than being held to change the risks facing the clinical commissioning group in undertaking its activities.

Treasury management operations are carried out by the finance department, within parameters defined formally within the NHS Clinical Commissioning Group standing financial instructions and policies agreed by the Governing Body. Treasury activity is subject to review by the NHS Clinical Commissioning Group and internal auditors.

33.1.1 Currency risk

The NHS Clinical Commissioning Group is principally a domestic organisation with the great majority of transactions, assets and liabilities being in the UK and sterling based. The NHS Clinical Commissioning Group has no overseas operations. The NHS Clinical Commissioning Group and therefore has low exposure to currency rate fluctuations.

33.1.2 Interest rate risk

The Clinical Commissioning Group borrows from government for capital expenditure when required, subject to affordability as confirmed by NHS England. The borrowings are for 1 to 25 years, in line with the life of the associated assets, and interest is charged at the National Loans Fund rate, fixed for the life of the loan. The clinical commissioning group therefore has low exposure to interest rate fluctuations.

33.1.3 Credit risk

Because the majority of the NHS Clinical Commissioning Group revenue comes via parliamentary funding, the NHS Clinical Commissioning Group has low exposure to credit risk. The maximum exposures as at the end of the financial year are in receivables from customers, as disclosed in the trade and other receivables note.

33.1.4 Liquidity risk

The NHS Clinical Commissioning Group is required to operate within revenue and capital resource limits, which are financed from resources voted annually by Parliament. The NHS Clinical Commissioning Group draws down cash to cover expenditure, as the need arises. The NHS Clinical Commissioning Group is not, therefore, exposed to significant liquidity risks.

	DOVEHAVEN CARE HOMES	20	0	20	0
Dr Christine Randall	CUMBERLAND HOUSE SURGERY	170	0	0	0
	VIRGIN CARE	334	0	37	0

The transactions listed above are payments made to organisations with which the Governing Body member or employee quoted has a connection, and has declared an interest. They are not payments made directly to the individuals concerned unless quoted otherwise.

The majority of the related party payments listed above relate to locally enhanced services that the CCG assumed responsibility for with effect from 1st April 2013 which are paid to all participating practices in the CCG.

The Department of Health is regarded as a related party. During the year the Clinical Commissioning Group has had a significant number of material transactions with entities for which the Department is regarded as the parent. For example:

- NHS England
- NHS Foundation Trusts
- NHS Trusts
- NHS Litigation Authority; and,
- NHS Business Services Authority.

In addition the Clinical Commissioning Group has had a number of material transactions with other government departments and other central and local government bodies. Most of these transactions have been with Sefton Metropolitan Borough Council.

39 Events after the end of the reporting period

There are no post balance sheet events which have taken place which will have a material effect on the financial statements of the Clinical Commissioning Group.

40 Losses and special payments

The Clinical Commissioning Group has not incurred any losses or special payments in the year to 31 March 2015.

41 Third party assets

The Clinical Commissioning Group held no assets on behalf of other parties during the year to 31 March 2015.

42 Financial performance targets

NHS Clinical Commissioning Groups have a number of financial duties under the NHS Act 2006 (as amended).

NHS Southport & Formby Clinical Commissioning Group's performance against those duties was as follows:

	2014-15 Target	2014-15 Performance	2013-14 Target	2013-14 Performance
Expenditure not to exceed income	1.0% Surplus	1.0% Surplus	1.0% Surplus	1.0% Surplus
