## Re: Freedom of Information Request

Please find below the response to your recent Freedom of Information request regarding post-operative and neuro-rehab purposes within NHS Southport and Formby CCG.

### Request/Response:

1. Spend and volume of patients receiving rehab services for:
  - a) Post-operative (or post-acute) rehab in care homes, step-down facilities, community hospitals etc.
  - b) Neuro-rehab in neuro-rehab facilities, care homes, community hospitals etc.

NHS Southport and Formby CCG provide a range of rehab services within our NHS commissioned acute and community providers e.g. intermediate care beds, early supported discharge for stroke and orthopaedic pathways.

The CCG commission a complex rehabilitation pathway with a high percentage of patients having neurological conditions e.g. ABI but with care provided within inpatient settings. The volume of patients receiving these services will be available from providers.

The table below shows values set within the contract for 19/20 referring to rehab services.

Planned Expenditure for 2019/20	
The Walton Centre NHS Foundation Trust	£92,000
Royal Liverpool University Hospitals NHS Trust	£197,000
St Helens & Knowsley Hospitals NHS Trust	£352,000
Priory Group – Oakvale Gardens	£130,000
Total	£771,000

A very small number of patients are supported through individually funded arrangements within the independent sector for specialist rehabilitation. These may include a care home setting. Funding is agreed on individual patient need and complexity and given the small number not appropriate to share providers and costs as potentially patient identifiable information.

2. A list (and if possible, spend) of providers (care homes, step-down facilities, neuro-rehab hospitals and community hospitals) which have been commissioned to provide rehab services (excluding outpatient) for:

a) Post-operative (or post-acute rehab)
